Mark Carrigan is a digital sociologist author and Lecturer in Education at the University of Manchester Learning to Flourish in the Age of AI Stephen M. Kosslyn, 2024-12-11 This timely book affirms that humans can flourish in the Age of AI by relying on their distinctive strengths and explores the skills and knowledge that are required to interact effectively efficiently and responsibly with AIs both today and in the future In Part I this book develops the Cognitive Amplifier Loop which allows humans to use AI to build on their cognitive and emotional strengths and manage their limitations Kosslyn discusses ways to employ this loop to offload tasks to AI and to utilize it to train us effectively and efficiently as well as how to use it to both learn and engage in critical thinking creative problem solving and manage cognitive and emotional constraints Part II establishes how to draw on the Cognitive Amplifier Loop to help us improve our human relationships addressing emotional intelligence effective communication leadership followership and collaboration skills Finally Part III builds on previous chapters to consider how to interact with AIs to help each of us learn and grow Throughout the book Kosslyn provides practical strategies and AI assisted exercises to help readers develop these essential skills and knowledge Kosslyn argues that by cultivating distinctively human capabilities we can not only coexist with AI but flourish in an AI infused world This book is a must read for anyone involved with AI education or Learning and Development in industry It will also appeal to anyone studying thinking and decision making AI and psychology and the use of technology in the classroom

Bioinspired Strategic Design Daniel J. Finkenstadt, Tojin T. Eapen, 2024-07-08 Organizations are commonly thrust into hostile operating environments where they are required to make strategic decisions that involve significant and costly tradeoffs Such hostile environments may be endemic such as an economic recession or idiosyncratic such as a predatory action by an adversary Many features of such hostile environments parallel those of living organisms that also demonstrate fine tuned strategies to improve their survivability under adverse conditions How can organizations use these bioinspired strategies to survive and even potentially innovate This book shows that the same three capabilities essential for the survival of living organisms in harsh environments efficiency resilience and prominence are also critical for organizations in their process of navigating through their own hostile environments Throughout the book the authors provide organizational executives with a systematic framework for thinking about strategic decision making in a hostile environment leaning on analysis of real world cases to draw out ontologies and methods for guiding their teams through disruptions change management innovation and process improvements In the first part organizations are provided with a systematic approach to analyzing three survivability influences forces resources and observers and their interrelationships While all three influences are active across all organisms and organizations the exact nature of their interrelationship and the significance of each influence are unique to every organism or organization The framework helps organizations nail down the specific features of their operating environment that can help or hinder survivability by analyzing the three influences Organizations can respond to external influences by developing three pronged capabilities efficiency resilience and prominence ERP that

respond to the three survivability influences Organizations often struggle with identifying the appropriate strategies to apply under different conditions Fortunately nature provides several mechanisms that can be analogically applied to guide business strategies The book contains many illustrations and examples of strategic principles observed among living organisms that can help an organization develop ERP capability Finally the book introduces seven strategic design heuristics Combination Elimination Separation Segmentation Replication Dynamics and Maximization observed in a living system that can be flexibly utilized to generate ideas to achieve strategic ends

Artificial Intelligence in Animal Behaviour, Veterinary Behaviour and Neurology Holger Andreas Volk, Jasmin Nicole Nessler, Anna Zamansky, Sebastian Meller, Annika Bremhorst, 2025-08-18

The new leap innovation Artificial Intelligence AI will significantly accelerate the speed of science and translate into clinical practice faster than clinicians ever have been used to Machine and deep learning techniques are now readily available to analyze large and complex data sets providing veterinary scientists with a tool to not only better understand complex behaviour traits and neurological conditions but also to delve into the nuances of animal behaviour itself AI can now write plausible sounding text recognize written or spoken human words recognize objects in images or analyze large amounts of data Different fields of applications are known so far such as improving and speeding up interpretation of radiologic findings interpretation of electroencephalography diagnosis of autism in children objectifying ataxia in dogs detecting pain in cats and assessing and characterizing animal behaviours across species At the time of writing more than 500 AI based algorithms have been approved by the FDA for human medicine most of which are used in radiology and neurology In veterinary neurology and animal behavioural science only a limited amount of research on AI has been done so far Most algorithms presented are merely fragments of usable programs and are not suitable for clinical application Therefore ready to use applications are rare yet essential for implementing AI into everyday routine diagnostic work ups scientific research and animal behavioural assessments The research topic will help to unite current efforts and provide a collection of articles to address some of the current scientific and behavioural gaps In the future a clinician might have a clinical decision support tool that generates accurate estimations of likely outcomes of neurological disease and animal behaviour combining anamnestic behavioural clinical pathology and imaging information We are interested in original research systematic reviews and opinion papers not only about the scope and potential of AI for Veterinary Behavior and Neurology but also about the intersection of AI with the study of animal behaviour ethical considerations and pitfalls that the development of AI generated tools could present Potential themes therefore include but are not limited to AI to recognize monitor diagnose or characterise behaviour

neurological deficits or conditions including a detailed analysis of animal behaviour across a variety of contexts and species
AI to assess behavioural states in both clinical and natural environments
AI to interpret scientific clinical data sets such as clinical pathology omics imaging EEG data and behaviour metrics
Ethical and legal considerations when applying or using AI tools in the study of animal behaviour and veterinary medicine
Potential of AI to enhance clinical practice in veterinary behavioural medicine
veterinary neurology and animal behaviour research
Potential of AI enhanced diagnostic and behavioural assessment tools with animals
