Doing Right A Practical Guide To Ethics For Physicians And Medical Trainees:

Doing Right Philip C. Hebert, Wayne Rosen, 2023 *Doing Right* Philip C. Hébert, 1996 Traditionally the knowledge needed by physicians has consisted largely of medical science But in recent years ethical questions have been looming ever larger in everyday clinical practice *Doing Right* is a practical guide to decision making in those situations Using dozens of real cases it analyzes the most common ethical problems encountered by physicians and medical trainees The many topics covered include truth telling refusal of treatment confidentiality rationing of health care parents refusal of treatment for their children living wills the ethics of medical research and assisted suicide Written simply and concisely with little philosophical or legal jargon *Doing Right* should be essential reading for medical students residents and practising physicians For those who teach bioethics it will be welcome as a practical and readable textbook **Doing Right** Philip C. Hébert, 2014-04 Aimed at second and third year ethics courses offered out of medical schools health sciences departments and nursing programs *Doing Right A Practical Guide to Ethics for Medical Trainees and Physicians* third edition is a practical guide to analyzing and resolving the ethical dilemmas medical practitioners face on a day to day basis *Doing Right* Philip Charles Hébert, 1996

Doing Right : A Practical Guide to Ethics for Medical Trainees and Physicians Philip C. Herbert, 2013 *Doing Right* Philip Hebert, 2008-11-06 *Doing Right* is a concise and practical guide to ethical decision making in medicine The text is aimed at second and third year one semester ethics courses offered in medical schools health sciences departments and nursing programs Health Humanities in Postgraduate Medical Education Allan D. Peterkin, Anna Skorzevska, 2018-08-24 Most medical schools in the US Canada and UK now incorporate some form of arts and humanities based teaching into their curricula What happens in residency is another story Most postgraduate programs do not continue the thread of such teaching although many residents would like to deepen their understanding of the medical humanities before they move into practice The humanities emphasize the human side of medicine and can provide a counterpoint to the reductionism of evidence based medicine and technological hubris for young doctors as they apply new knowledge and skills in ambiguous real life encounters with patients who are living with complicated health problems Humanities based education can help both sides of the relationship programs are shown to reduce burnout and mental health issues in young physicians and can also help learning practitioners grapple with the most difficult aspects of their craft how does one persuade patients on a course of treatment while respecting informed consent How does one work with families How does one listen to and treat patients exhibiting self harm tendencies Available research may demonstrate the efficacy of such exposures but provide little practical advice or resources for setting up programs across specialty and sub specialty disciplines *Health Humanities in Post Graduate Medical Education* will fill this gap in knowledge translation for the thousands of residency programs worldwide allowing educators supervisors and residents themselves to create robust and educationally sound workshops seminars study groups lecture series research and arts based projects publications and events *Good Medicine* Philip Hebert, 2016-04-19

Award winning physician Philip C H bert creates a brave and intimate portrait of the complex ethical imperatives at the heart of good medicine doctors do not have all the answers patients must be heard and their needs desires fears and experiences must be reflected in how practitioners look after them Medical science continues to advance to previously unimagined heights in its diagnostic and treatment capabilities With these advances however come unexpected ethical dilemmas for practitioners patients and families In Good Medicine Dr H bert approaches these questions of pressing and fundamental importance from the dual point of view of acclaimed physician and long time patient With remarkable balance and sensitivity he explores a range of politically constitutionally and ethically contentious matters including assisted suicide treatment refusal and suspension and the overall allocation of medical resources H bert pairs his artful analysis with the real life often deeply moving stories of those who have lived these challenges H bert offers piercing and compassionate insight into the relationship between patients and medical professionals and guides readers towards the open and empathetic communication needed to ensure good medicine for everyone

Postphenomenological Investigations

Rosenberger,,Peter-Paul Verbeek,2015-05-20 Postphenomenological Investigations Essays on Human Technology Relations provides an introduction to the school of thought called postphenomenology and showcases projects at the cutting edge of this perspective Postphenomenology presents a unique blend of insights from the philosophical traditions of phenomenology and American pragmatism and applies them to studies of user relations to technologies These studies provide deep descriptions of the ways technologies transform our abilities augment our experience and shape the world around us This book proceeds with a preface by Don Ihde postphenomenology s founder and a detailed review of the main ideas of this perspective by the editors Robert Rosenberger and Peter Paul Verbeek The body of this volume is composed of twelve postphenomenological essays which reflect the expansive range detail orientation and interdisciplinarity of this school of thought These essays confront a broad assortment of topics both abstract and concrete Abstract topics addressed include metaphysics ethics methodology and analysis of the notions of selfhood skill training speed and political activism Just a few of the concrete topics studied include human like interactive robots ethics education image interpretation in radiology science fiction tropes transportation history wearable computing and organ donation protocols for brain dead bodies The volume concludes with constructive critiques of postphenomenology by Andrew Feenberg Diane Michelfelder and Albert Borgmann all figures whose work is relevant to postphenomenological projects
