The Law of Interactions Between International Organizations Henner Gött, 2021-02-02 The book analyses how international law addresses interactions between international organizations In labour governance these interactions are ubiquitous They offer each organization an opportunity to promote its model of labour governance yet simultaneously expose it to adverse influence from others The book captures this ambivalence and examines the capacity of international law to mitigate it Based on detailed case studies of mutual influence between the International Labour Organization the World Bank and the Council of Europe the book offers an in depth analysis of the pertinent law and its key challenges both at institutional and inter organizational level The author envisions a law of inter organizational interactions as a normative framework structuring interactions and enhancing the effectiveness and legitimacy of multi institutional governance Contexts Of Business In Western Asia: Land Of Bazaars And High-tech Booms Leo-paul Dana, Aidin Salamzadeh, Veland Ramadani, Ramo Palalic, 2022-05-05 Not one size fits all Yet some books teach business with minimal focus on the context for business In reality firms large and small are highly affected by the context in which they operate yet context is not uniformly conceptualized theorized and operationalized by scholars of business and management While most theories have come from developed countries with bountiful contexts the diverse contexts of Western Asia are little understood Religious factors are profoundly dominant in Western Asia and businesses in this diverse area operate with considerations that are rarely considered in research This book reveals a variety of schools of thought that have molded several business models and mechanisms which are to some extent different from the context of Western economies Theatre of the Rule of Law Stephen Humphreys, 2010-11-11 Theatre of the Rule of Law presents a sustained critique of global rule of law promotion an expansive industry at the heart of international development post conflict reconstruction and security policy today While successful in articulating and disseminating an effective global public policy rule of law promotion has largely failed in its stated objectives of raising countries out of poverty and taming violent conflict Furthermore in its execution this work deviates sharply from the rule of law as commonly conceived To explain this Stephen Humphreys draws on the history of the rule of law as a concept examples of legal export during colonial times and a spectrum of contemporary interventions by development agencies and international organisations Rule of law promotion is shown to be a kind of theatre the staging of a morality tale about the good life intended for edification and emulation but blind to its own internal contradictions
