Dominique Perrault Small Scale:

Dominique Perrault Anatxu Zabalbeascoa, Javier Rodriguez Marcos, **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries **Dominique Perrault** Dominique Perrault, Kevin R. Klinger, 1999 *Dominique Perrault* Andrea Bruschi, 2002 *Dominique Perrault* Gilles de Bure, Dominique Perrault, 2004 By the time he was 40 architect Dominique Perrault had already designed France's important new national library the last of the great projects undertaken by president Francois Mitterrand Since then he counts the velodrome and Olympic swimming pool in Berlin the Aplex factory near Nantes and the Marinsky II in Saint Petersburg among his many projects Paradoxically although a prolific international designer and builder he advocates for the disappearance of architecture Committed to concepts and architecture as manifesto Perrault excels in games of masks For him appearance disappearance derealization dematerialization crossings and lightening speed make up architecture's very substance His architecture is one assembled from time space tension and energy which this book attempts to decipher and unveil Book jacket **Dominique Perrault** Dominique Perrault, Laurent Stalder, 2002-07-04 The complete edition of the works of one of France's leading architects **Contemporary Landscapes of Contemplation** Rebecca Krinke, 2005-11-14 Contemplative landscape and contemplative space are familiar terms in the areas of design landscape architecture and architecture Krinke and her highly regarded contributors set out to explore definitions theories and case studies of contemplative landscapes The contributors Marc Treib John Beardsley Michael Singer Lance Necker Heinrich Hermann and Rebecca Krinke have spent their careers researching critiquing and making landscapes Here they investigate the role of contemplative space in a post modern world and examine the impact of nature and culture on the design or interpretation of contemplative landscapes The essays drawn from both scholarship and personal experience explore the links between spaces designed to provide health benefits and contemplative space *World Architecture*, 2002 **Reforming Healthcare Architecture** Young Im Kim, 2002 [MOVE](#) Michael Schumacher, Oliver Schaeffer, Michael-Marcus Vogt, 2012-11-05 Dynamic components and adaptive elements are becoming increasingly important in contemporary architecture and not just because of their visual effect If architects and engineers are engaging more and more with the issue of movement whether in the form of sun tracking solar cells lowerable walls or intelligently programmed elevators it's because they are busy exploring responses to three challenges How can we control and reduce the energy requirement of buildings How can we

expand the range of possible uses And how can we represent illustrate accommodate and control dynamic movements in buildings Designers and builders who seek to use kinetic components face technical and design challenges that aren't covered by traditional structural theory For these users this book presents the technical tools and constructional solutions that will allow them to implement these movements concretely and deploy them functionally within the domains of Energy Change of Use and Interaction First it lays out the fundamentals and design principles of kinetics in architecture technology art and nature in a structured manner In a third section forty movable elements are shown in action each on a double page with specially prepared phase drawings and organized by type of movement including rotation sliding folding and transformation The international examples from noted architects range from window mechanisms to solar protection and light redirection systems movable walls and roofs and movable civil engineering structures

Emerging Urbanity Richard Marshall, 2013-09-05 Discussions on the global economy focus on the hyper mobility of capital the possibility of instantaneous transmission of information and money around the globe the centrality of information outputs to our economic systems and emphasise the neutralisation of geography and of places What is ignored however is that even the most advanced information industries need a material infrastructure of buildings and work processes and considerable agglomeration in order to operate in global markets Further the globalisation of economic activity has brought with it not only a vast dispersal of offices and factories but also a growing importance of central functions to manage and coordinate such worldwide networks of activities The development of global urban projects is one manifestation of this move towards centrality in urban situations These large scale urban projects are the result of governments seeking competitive advantage in the global economy They are critical components of a nation's global infrastructure In the booming economies of the Asia Pacific Rim prior to the Asian Economic Crisis these urban developments were seen as key components of national economic policies In their making they require a conscious effort to arrange material infrastructure and reinforce that there is a role for urban design in this making

Emerging Urbanity is an exploration of this role in nine global urban projects in the Asia Pacific Rim **Oz**, 2001
