Flexible Lives Stefanie

Reissner, Michal Izak, 2025-08-07 This geographically and methodologically diverse volume shines the spotlight on a variety of flexible working practices beyond the predominantly Western perspective and zooms in on the gendered aspects of flexible working The increasing use of flexible work arrangements has decoupled work from time and space making the world of work and home increasingly fluid and challenging to manage The Covid 19 pandemic in particular has been a catalyst for questioning accepted norms of where when and how work takes place This book seeks to explore the impact which this reshaping of traditional modes of working has had on workplace interactions and relationships as well as on managing the boundaries between familial and working lives In this way this collection contributes to a wider dialogue concerning the flexibility challenges encountered by white collar workers which is needed now more than ever This book will be relevant to scholars practitioners and policymakers in the fields of gender studies organizational behavior human resources and labor economics It will be particularly useful for those examining the impact of remote work the future of work organizational culture and the social and economic implications of shifting work practices The chapters in this book were originally published in Culture and Organization and are accompanied by an updated Introduction and a new Epilogue

Building

Tomorrow's Biomedical Workforce: Evaluation of How Evidence-Based Training Programs Align Skill

Development and Career Awareness with a Broad Array of Professions Adriana Bankston, Rebekah L. Layton, Audra Van Wart, 2025-08-27 Building the future STEM workforce requires robust federal investments to support the next generation of innovators as well as systemic changes to enable graduate and postdoctoral researchers to transition with confidence into the biomedical workforce This effort involves the transformation of the biomedical research enterprise and training environment at all levels but especially at the predoctoral and postdoctoral levels Innovative initiatives in education and training as well as career and professional development of biomedical trainees are necessary to build upon the robust biomedical workforce of today and create and sustain a diverse innovative and highly trained biomedical workforce of

tomorrow An important aspect of supporting the biomedical workforce relates to changes within training and the research enterprise with opportunities for re imagining what STEM education should look like at different levels including providing agency for junior scientists in the field The future of the field should focus on inclusivity supporting trainees from different backgrounds and with diverse perspectives including but not limited to intersectional identities in race ethnicity gender sexual orientation first generation status and international talent in STEM This requires critical policy changes in order to support the transition of biomedical research professionals into the labor market Western Banker ,1924
