MULTIMEDIA COMPUTING Dr. Tariq Hussain, 2020-10-21 The topic of multimedia is speedily becoming an essential in computer science and engineering prospectuses exclusively now that multimedia touches most facets of these fields. Multimedia was originally seen as an upright application area that is a niche application with approaches that belong only to itself. However, like pervasive computing, multimedia is now principally a parallel application area and forms an imperative component of the study of computer graphics, image processing, databases, real time systems, operating systems, information retrieval, computer networks, computer vision and so on. Multimedia is no longer just a toy but forms part of the technological environment in which we work and think. This book fills the need for a College hence the title of the text. In conjunction with this text, a full-fledged course should also allow students to make use of this knowledge to carry out interesting or even wonderful practical projects in multimedia, interactive projects that engage and sometimes amuse and perhaps even teach these same concepts. The book Multimedia Computing comprehends five chapters for skill development course of B A B Sc BCA Semester 5th according to the syllabus of University of Jammu which inculcates theoretical practical portions.
