and issues before us as contributors present the methodological puzzles they have become knotted with The short and imaginative case studies offer new ways of teaching learning and doing lively and rigorous research This is research as close up observations infrastructural interventions and imaginative play How to Do Social Research With will be essential for anyone interested in expanding their repertoire of social research methods *Methods* Winston Jackson,1999

A History of Sociological Research Methods in America, 1920-1960 Jennifer Platt,1996-02-23 This is the first book on the general history of U S sociological research methods It provides systematic archival documentary and interview data that question conventional views showing that the extensive work done on sociological theory gives only a partial picture of the history of sociology Research practice is affected by many other factors This detailed study develops our understanding both of the history of social thought and the settings in which social research is produced raising wider issues of method in the history of ideas

Pioneering Social Research Paul Thompson,Ken Plummer,Neli Demireva,2021-02-22 Presenting the landmark Pioneers life stories project this one of a kind book documents how modern social research in the UK was shaped It sheds new light on the lives methods and motivations of men and women who helped develop a new world of research methodology pioneered feminist research and first confronted the issues of race and ethnicity It combines a fascinating history of the generations who built outstanding and influential social research with a valuable resource for future research and teaching on methods

Doing Interpretive Research Koen P. R. Bartels,Hendrik Wagenaar,2025-05-13 Interpretivism has an intuitive appeal to many social researchers but they often feel ill equipped to do it Other social researchers tend to believe that interpretivism is a specialized niche with little relevance to their research practice What has been lost is the awareness that interpretation is an explanatory logic and form of inquiry that is at the root of all social science research including quantitative research In this volume the authors guide social researchers and instructors in better understanding and improving the experience of doing interpretive research They explore the centrality of experience in learning and teaching interpretive research paying special attention to the role of emotions in the learning process and the way that negative emotions such as doubt and anxiety can impart learning The authors provide a novel approach to methods teaching by offering a set of heuristics open ended strategies of inquiry and discovery for improving the practice of social research Uniquely they demonstrate how emotions can be leveraged in the learning process to uncover surprising new insights about social reality and unlock researchers imagination They reveal how social researchers engaged or interested in interpretivism in learning can turn their research into an enjoyable productive and imaginative experience

Accountability in Social Research Norma R.A. Romm,2001-05-31 The book considers issues relating to accountability in social research by juxtaposing seven ways of approaching the issues and by moving toward the development of a particular approach to the earning of trust on the part of researchers A conception of the practice and assessment of discursive accountability is presented as an option for consideration The book grapples with the issue of accountability in social research by considering

the extent to which and ways in which it is addressed in a number of different positions regarding the practice of social science. The focus of the book is on reviewing discourses around the practice of professional inquiry with a view to highlighting differing arguments around the question of what it might mean to assess researchers' accountabilities. The book is structured around considering in detail various views on accountability in relation to one another. A comprehensive comparison of arguments is presented in the first two chapters of the book. The debate that is set up in the first two chapters forms the background to the elaboration and development in Chapter 3 of constructivist argumentation in relation to the question of how accounts as set forth by researchers should be treated by colleagues, participants and other audiences. The continuing debate about the status to be afforded to constructions developed by researchers is tackled in this chapter. Constructivist thinking is then extended toward what is named in the book a trusting constructivist position. This position focuses on ways in which trust earning and trust awarding in the context of social inquiry can proceed without researchers having to justify themselves as striving to gain access to knowledge as representation of reality. Through the development of the trusting constructivist position, the book explores ways of creating trust through processes of social discourse. An assessment of actual research projects in view of the debates set up in earlier chapters then takes place. Through these assessments, readers can relate the details of the arguments developed in earlier chapters to their implications for judging the practice of accountable social inquiry.
