A Covenantal Imagination William Johnson Everett, 2021-12-15 This harvest of articles drawn from William Johnson Everett's career of teaching and research on four continents and in a variety of institutions shows the breadth, depth and diversity of his interests. Like spotlights in the wider field of Christian social ethics, they illuminate the key threads that have held together an emerging tapestry of thought woven around the powerful concept of covenant. Whether lifting up concepts of covenant federalism and corporation, the oikos of work, family and faith, the public nature and mission of the church, or the ethical meaning of journey metaphors, his rich and artful style leads us into thinking more deeply about the way our lives are joined in a covenantal imagination about a more just and sustainable world.

Finance Ethics John Dobson, 1997 The first book ever to integrate business ethics with financial economics. *Finance Ethics* shows how ethical behavior fits within the rational profit maximizing finance paradigm. Dobson argues that even in economic terms the finance paradigm has a serious flaw: it views the firm and financial markets in general as contractual nexuses, yet it fails to supply any adequate mechanisms for enforcing those contractual relations. *Finance Ethics* is therefore not just a moral critique of the finance paradigm, arguing that self-interested profit making must be constrained by ethics. Rather, it is a critique from within that paradigm in which truth becomes a rational mechanism to enforce contracts and virtuous behavior is shown to make the most business sense.
