**Bonnie O. Ericson**

### **Doing Time Notes From The Undergrad:**

Doing Time Rob Thomas,2012-06-12 Each student at Robert E Lee High School is required to perform two hundred hours of community service in order to graduate Their responses to the assignment are as varied as the organizations for which they volunteer     Rats Saw God Rob Thomas,2013-03-05 Kit includes 9 copies of the book and discussion questions

**Doing Your Undergraduate Project** Denis Reardon,2006-08-10 Doing Your Undergraduate Project is a practical step by step guide to managing and developing a successful undergraduate project The book covers all aspects of project management explaining in a clear and structured way how to undertake a project and helping readers to identify and acquire the necessary skills to plan and carry out the research and writing This practical and concise book provides Advice for preparing a project and choosing a topic Guidelines for writing a project proposal A checklist for planning A guide to producing a literature review Advice on choosing and implementing appropriate methodology An awareness of ethical issues Information for writing up the report Written in a lively and engaging manner this detailed and accessible manual is an invaluable resource for students across the social sciences working on their undergraduate project SAGE Study Skills are essential study guides for students of all levels From how to write great essays and succeeding at university to writing your undergraduate dissertation and doing postgraduate research SAGE Study Skills help you get the best from your time at university Visit the SAGE Study Skills hub for tips resources and videos on study success     **Teaching Undergraduate**

**Science** Linda C. Hodges,2023-07-03 This book is written for all science or engineering faculty who have ever found themselves baffled and frustrated by their undergraduate students lack of engagement and learning The author an experienced scientist faculty member and educational consultant addresses these issues with the knowledge of faculty interests constraints and day to day concerns in mind Drawing from the research on learning she offers faculty new ways to think about the struggles their science students face She then provides a range of evidence based teaching strategies that can make the time faculty spend in the classroom more productive and satisfying Linda Hodges reviews the various learning problems endemic to teaching science explains why they are so common and persistent and presents a digest of key ideas and strategies to address them based on the research she has undertaken into the literature on the cognitive sciences and education Recognizing that faculty have different views about teaching different comfort levels with alternative teaching approaches and are often pressed for time Linda Hodges takes these constraints into account by first offering a framework for thinking purposefully about course design and teaching choices and then providing a range of strategies to address very specific teaching barriers whether it be students motivation engagement in class ability to problem solve their reading comprehension or laboratory research or writing skills Except for the first and last chapters the other chapters in this book stand on their own i e can be read in any order and address a specific challenge students have in learning and doing science Each chapter summarizes the research explaining why students struggle and concludes by offering several teaching options

categorized by how easy or difficult they are to implement Some for example can work in a large lecture class without a great expenditure of time others may require more preparation and a more adventurous approach to teaching Each strategy is accompanied by a table categorizing its likely impact how much time it will take in class or out and how difficult it will be to implement Like scientific research teaching works best when faculty start with a goal in mind plan an approach building on the literature use well tested methodologies and analyze results for future trials Linda Hodges message is that with such intentional thought and a bit of effort faculty can succeed in helping many more students gain exciting new skills and abilities whether those students are potential scientists or physicians or entrepreneurs Her book serves as a mini compendium of current research as well as a protocol manual a readily accessible guide to the literature the best practices known to date and a framework for thinking about teaching

*A Mathematician's Practical Guide to Mentoring Undergraduate Research* Michael Dorff, Allison Henrich, Lara Pudwell, 2019-09-16 A Mathematician's Practical Guide to Mentoring Undergraduate Research is a complete how to manual on starting an undergraduate research program Readers will find advice on setting appropriate problems directing student progress managing group dynamics obtaining external funding publishing student results and a myriad of other relevant issues The authors have decades of experience and have accumulated knowledge that other mathematicians will find extremely useful
