## **Donner La Mort:**

**The Gift of Death** Jacques Derrida, 1996-06 In *The Gift of Death* Jacques Derrida's most sustained consideration of religion to date he continues to explore questions introduced in *Given Time* about the limits of the rational and responsible that one reaches in granting or accepting death whether by sacrifice murder execution or suicide Derrida analyzes Patocka's *Heretical Essays on the History of Philosophy* and develops and compares his ideas to the works of Heidegger Levinas and Kierkegaard A major work *The Gift of Death* resonates with much of Derrida's earlier writing and will be of interest to scholars in anthropology philosophy and literary criticism along with scholars of ethics and religion *The Gift of Death* is Derrida's long awaited deconstruction of the foundations of the project of a philosophical ethics and it will long be regarded as one of the most significant of his many writings *Choice* An important contribution to the critical study of ethics that commends itself to philosophers social scientists scholars of religion and those made curious by the controversy that so often attends Derrida *Booklist* Derrida stares death in the face in this dense but rewarding inquiry *Provocative Publishers Weekly*

Volume 11, Tome II: Kierkegaard's Influence on Philosophy Jon Stewart, 2016-12-05 Kierkegaard's relation to the field of philosophy is a particularly complex and disputed one He rejected the model of philosophical inquiry that was mainstream in his day and was careful to have his pseudonymous authors repeatedly disassociate themselves from philosophy But although it seems clear that Kierkegaard never regarded himself as a philosopher there can be no doubt that his writings contain philosophical ideas and insights and have been profoundly influential in a number of different philosophical traditions The tomes in this volume seek to document the different traditions of the philosophical reception of Kierkegaard's thought and the articles demonstrate the reach of Kierkegaard's writings in philosophical contexts that were often different from his own The present volume attempts to document these different traditions of the philosophical reception of Kierkegaard's thought The articles featured here aim to demonstrate the vast reach of Kierkegaard's writings in philosophical contexts that were often quite different from his own Tome II is dedicated to exploring Kierkegaard's influence on Francophone philosophy The French intellectual tradition squares well with Kierkegaard's eclectic profile since its leading figures are often difficult to classify unambiguously as philosophers theologians literary critics or simply writers Kierkegaard's thinking was highly influential for many generations of French philosophers right up to the present It was not just existentialism that tried to co-opt Kierkegaard for its own purposes he has also been influential in the context of almost every modern school of French thought phenomenology feminism structuralism post structuralism semiotics and deconstruction **The Prayers and Tears**

**of Jacques Derrida** John D. Caputo, 1997-09-22 *The Prayer and Tears* of Jacques Derrida takes its point of departure from Derrida's more recent sometimes autobiographical writings and closely examines the religious motifs that have emerged in his later works John D Caputo's provocative interpretation of Derrida's thinking also makes an original contribution to the question of the relevance of deconstruction for religion Caputo's Derrida is a man of faith who bridges Jewish and Christian

traditions The deep messianic apocalyptic and prophetic tones in Derrida's writings Caputo argues bespeak his broken covenant with Judaism Through its startling exploration of Derrida's impossible religion the book sheds light on the implications of deconstruction for an understanding of religion and faith today from back cover     Interfaces in Functional Discourse Grammar Lucía Contreras-García, Daniel García Velasco, 2021-08-23 In grammar design a basic distinction is made between derivational and modular architectures This raises the question of which organization of grammar can deal with linguistic phenomena more appropriately The studies contained in the present volume explore the interface relations between different levels of linguistic representation in Functional Discourse Grammar as presented in Hengeveld and Mackenzie 2008 and Keizer 2015 This theory analyses linguistic expressions at four linguistic levels interpersonal representational morphosyntactic and phonological The articles address issues such as the possible correspondences and mismatches between those levels as well as the conditions which constrain the combinations of levels in well formed expressions Additionally the theory is tested by examining various grammatical phenomena with a focus both on the English language and on typological adequacy anaphora raising phonological reduction noun incorporation reflexives and reciprocals serial verbs the passive voice time measurement constructions coordination nominal modification and connectives Overall the volume provides both theoretical and descriptive insights which are of relevance to linguistics in general     **British and Foreign State Papers** Great Britain.
