Dont Know Much About The Solar System:

Don't Know Much About the Solar System Kenneth C. Davis, 2004-09-07 Nine planets More than seventy moons And hundreds of stellar facts about the Solar System True or False 1 Venus is the coolest planet in our solar system 2 Halley's comet returns every seventy six years 3 The universe is 15 to 20 billion years old Blast Off and discover the secrets of outer space Have you ever wondered why our galaxy is called the Milky Way or if you could really catch a shooting star Here's your chance to find out without ever leaving Earth Best selling author Kenneth C Davis packs fascinating facts and riddles into his signature question and answer format He makes exploring the solar system an out of this world experience *The Solar System As We Know It Does Not Exist* Lewis Fofanah, 2022-01-14 For many centuries we have been told that the earth is a Globe and that it rotates on its axis and itself is revolving around the sun According to the astrophysicists our sun is 93 million miles away from the earth on the average Our earth is one of many planets that revolve around the sun Almost all of us have never questioned this information we just run away with it as if it is a fact In this book the author has examined and analyzed this information logically and scientifically and has concluded that it is not true The author has given everyone a challenge to debunk his analyses and prove otherwise All you must do is buy his book and follow the instruction on how to accept his challenge You stand to gain 50 000 if you win **The Earths in Our Solar System** Emanuel Swedenborg, 1910

Don't Know Much About The Solar System Kenneth C. Davis, 2004-09-01 Reprint Originally published 2001 **Don't Know Much About Space** Kenneth C. Davis, 2001-07-24 If Earth is round why don't people on the other side of the world fall off see page 26 Is Mars red because it's embarrassed see page 49 If black holes are invisible how do we know they're there see page 86 h3 Using the popular style that has won millions of readers best selling author Kenneth C Davis blasts off for the stars With an entertaining question and answer format amusing anecdotes and fact filled sidebars he sets his sights on the mysteries of space Humorous illustrations along with NASA photographs add fun and excitement to this fascinating and comprehensive book Davis takes you back to the time when the Babylonians first charted the stars over three thousand years ago You'll uncover amazing facts about the planets and stars read how people were once convinced that Earth was the center of the universe and discover how the experience of moonwalking astronauts may someday lead us to become pioneers on other planets This book is the perfect companion to Don't Know Much About The Universe and all the other books in the New York Times best selling Don't Know Much About series [Viewing and Imaging the Solar System](#) Jane Clark, 2014-09-24 [Viewing and Imaging the Solar System](#) A Guide for Amateur Astronomers is for those who want to develop their ability to observe and image Solar System objects including the planets and moons the Sun and comets and asteroids They might be beginners or they may have already owned and used an astronomical telescope for a year or more Newcomers are almost always wowed by sights such as the rings of Saturn and the moons of Jupiter but have little idea how to find these objects for themselves with the obvious exceptions of the Sun and Moon They also need guidance about what equipment

besides a telescope they will need This book is written by an expert on the Solar System who has had a lot of experience with outreach programs which teach others how to make the most of relatively simple and low cost equipment That does not mean that this book is not for serious amateurs On the contrary it is designed to show amateur astronomers in a relatively light hearted and math free way how to become serious
