Identifying and Serving Diverse Gifted Learners Jaime A. Castellano, Kimberley L. Chandler, 2022-03-14. Grounded in a combination of evidence, personal narratives, interviews, data, and research, *Identifying and Serving Diverse Gifted Learners: Meeting the Needs of Special Populations in Gifted Education* is a guiding resource for all stakeholder groups in gifted education to shift the equity needle of gifted programs in America. Though it is the right of Black, Hispanic, Latinx, twice exceptional, 2e, low income, and other special populations of students to have access to advanced academic programs in the American educational system, complex and deep-rooted systemic issues often block the way. This seminal text thoughtfully brings the conversation around historically underrepresented students in gifted education to the forefront, drawing on real-world examples to provide an accessible discussion of foundational, interdependent topics including current research and promising educational practices. Readers will develop a basic theoretical understanding of the issues and be able to advance more responsive programs and experiences for low-income, racially, culturally, and linguistically diverse gifted students and other diverse gifted populations. This text serves as a beacon to motivate K-12 educators, researchers, and scholars to carry the torch of advocacy on behalf of those students historically underrepresented in programs for the gifted and talented.

The Governance of Artificial Intelligence in the "Autonomous City" Federico Cugurullo, Tan Yigitcanlar, Xiaoling Zhang, Vincent J. Del Casino Jr., Natalie Marie Gulsrud, Sarah Barns, 2023-10-18. Artificial intelligence (AI) is now mediating and in some cases seen to be controlling key urban services and infrastructures, thus becoming a prominent feature of the contemporary city. As portrayed

in recent studies the autonomous city can be understood as a city where urban artificial intelligences perform tasks and take on roles which have traditionally been the domain of humans At stake in these debates are questions related to the meaning and ongoing role of intelligence for both humans and machines While autonomous cars transport people service robots run shops drones deliver goods and city brains govern entire cities humans are redefining the meaning of what smart means in the city and what role the human being may play in future urban spaces With humans shifted to new sectors of the economy or pushed aside by algorithms and robotic agents creating new ways of seeing and governing the city we raise the question as to whether or not cities are becoming more autonomous from human experience in the sense that their operation does not rely as much on human inputs anymore Youth's Companion ,1896 *Resources in Education* ,1990 **New York Magazine** ,1990-06-11 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea The Canada School Journal ,1884 **The Survey** ,1922 **Illinois Journal of Education** ,1927 School ,1921 Musical Observer ,1922 County Gentleman and Land and Water ,1905 **American Nut Journal** ,1924 **The Athenaeum** James Silk Buckingham,John Sterling,Frederick Denison Maurice,Henry Stebbing,Charles Wentworth Dilke,Thomas Kibble Hervey,William Hepworth Dixon,Norman Maccoll,Vernon Horace Rendall,John Middleton Murry,1895 *"The" Athenaeum* ,1895
