Personalized Health and Precision Medicine in Practice Luca Chiapperino, Francesco Panese, Séverine Louvel, Sylvain Besle, 2024-02-26. So-called personalized health and precision medicine consist of a plethora of distinct endeavors. Ranging from pharmacogenomics to big data medicine, these endeavors are set out to tailor treatment and prevention to different combinations of data on the biological, behavioral, social, and environmental determinants of health. Currently reaching the trial of implementation across a diverse range of local and national contexts, these innovations call for a thorough empirical scrutiny of the normative, practical, and technical reconfigurations that they engender. Personalized precision approaches to medicine demand substantive normative work that consists in reforming social contracts in healthcare and in ensuring a consistent commitment to change from both institutional actors and citizens.

Breaking Structural Inequality and Enhancing Social Justice in Higher Education Malahlela, Moyagabo Kate, Sadiki, Marubini Christinah, 2025-12-03. Higher education is often a path towards opportunity and social mobility, yet systemic inequalities shape access, value, and success within these institutions. Structural barriers rooted in race, class, gender, ability, and other intersecting identities persist in admissions processes, curriculum design, faculty representation, and resource allocation. Addressing these inequities requires a transformative commitment to social justice that reimagines the purpose and practices of higher education. By dismantling exclusionary systems and creating inclusive, equitable environments, colleges and universities can encourage societal change, empower historically marginalized communities, and advance a more just and equitable future. *Breaking Structural Inequality and Enhancing Social Justice in Higher Education* explores how innovative higher education organizations may advance social justice through inclusive practices. It examines the moral and social responsibility of higher education to address structural inequalities by implementing practical strategies that support historically marginalized groups, empowering them to participate in society. This book covers topics such as gender and diversity, higher education, and professional development, and is a useful resource for educators, sociologists, policymakers, academicians, researchers, and scientists.

The Handbook for the Future of Work Julie MacLeavy, Frederick Harry Pitts, 2024-12-26. The Handbook for the Future of Work offers a timely and critical analysis of the transformative forces shaping work and employment in the twenty-first century. Focusing on the past two decades, the handbook explores how technological advancements, automation, and a shifting capitalist landscape have fundamentally reshaped work practices and labour relations. Beyond simply outlining the challenges and opportunities of automation, the handbook integrates these emerging realities with established discussions of work. Importantly, it moves beyond dominant technology-centric narratives, probing into broader questions about the nature of capitalism in a time of crisis and the contestation for alternative economic models. With contributions from established and emerging authors based in institutions around the world, the handbook offers a systematic overview of the developments that

have sparked radical shifts in how we live and work and their multifaceted impacts upon social relations and identities practices and sectors politics and environments The handbook is unique in its exploration of the potential for economic transformations to reshape the centrality of work in our social and political imaginaries A useful resource for students and researchers the handbook serves as an essential guide to this new intellectual landscape

Information and Communications for Development 2018 World Bank, 2018-11-08 The Information and Communications for Development series looks in depth at how information and communications technologies are affecting economic growth in developing countries This new report the fourth in the series examines the topic of data driven development or how better information makes for better policies The objective is to assist developing country firms and governments in unlocking the value of the data they hold for better service delivery and decision making and to empower individuals to take more control of their personal data We are undoubtedly experiencing a data revolution in which our ability to generate process and utilize information has been magnified many times over by the machines that we increasingly rely upon This report is about how the data revolution is changing the behavior of governments individuals and firms and how these changes affect the nature of development economic social and cultural How can governments extract value from data to improve service delivery in the same way that private companies have learned to do for profit Is it feasible for individuals to take ownership of their own data and to use it to improve their livelihoods and quality of life Can developing country firms compete with the internet majors on their own turf and be even more innovative in their use of data to serve local customers better Though the report is aimed primarily at government policy makers it also has great relevance for individuals concerned about how their personal data is used and how the data revolution might affect their future job prospects For private sector firms particularly those in developing countries the report suggests how they might expand their markets and improve their competitive edge For development professionals the report provides guidance on how they might use data more creatively to tackle long standing global challenges such as eliminating extreme poverty promoting shared prosperity or mitigating the effects of climate change The report's chapters explore different themes associated with the supply of data the technology underlying it and the demand for it An overview chapter focuses on government use of data and presentation of definitions Part I of the report then looks at the supply side of the data sector with chapters on data connectivity and capacity where data comes from how it is stored and where it goes and data technology specifically big data analytics and artificial intelligence and how this is contributing to development Part II looks at the sector's demand side with a chapter on people's use of data and another that examines how firms use digital platforms in the data economy and how that contributes to competitiveness Part III brings together the policy implications for developing country stakeholders with a chapter considering government policies for data including data protection and privacy A closing Data Notes appendix looks at statistical indicators associated with the use of data and presents the 2018 update of the Digital Adoption Index DAI a composite indicator introduced in the
