**Artificial Intelligence for DevOps and Site Reliability Engineering: Theories, Applications, and Future Directions** Swarup Panda, 2025-08-07 This book offers an in-depth examination of the transformative impact Artificial Intelligence (AI) and Machine Learning (ML) have on DevOps and Site Reliability Engineering (SRE). It sits at the intersection of the cutting edge in AI and at how actual operations can use smart technology to refine your CI/CD pipeline, tell when incidents are rolling your way, help to automate resolution and improve the eyes on monitoring. Readers will learn complete details on AI-driven observability, finding anomalies, performance tuning, and capacity planning, helping organizations to predict failures, improve up times, and accelerate software with a rock-solid foundation. With clear and detailed explanations bolstered by case studies with leaders from the industry and actionable frameworks to implementation, DevOps engineers, SRE professionals, and IT executives will learn how to effectively operationalize AI within their environments. It also includes critical content on AI ethics, transparency, and governance, a must for today's high-stakes production environments. Readers will walk away fully prepared to use AI to automate the repetitive and time-consuming tasks based on data and to make data-informed decisions that strengthen their infrastructure and deliver operational excellence.

**Proceedings of the XVII International symposium Symorg 2020** Dušan Starčević, Sanja Marinković, 2020-06-30 Ever since 1989 the Faculty of Organizational Sciences University of Belgrade has been the host of SymOrg, an event that promotes scientific disciplines of organizing and managing a business. Traditionally the Symposium has been an opportunity for its participants to share and exchange both academic and practical knowledge and experience in a pleasant and creative atmosphere. This time, however, due to the challenging situation regarding the COVID-19 pandemic, we have decided that all the essential activities planned for the International Symposium SymOrg 2020 should be carried out online between the 7th and the 9th of September 2020. We are very pleased that the topic of SymOrg 2020, Business and Artificial Intelligence, attracted researchers from different institutions both in Serbia and abroad. Why is artificial intelligence a disruptive technology? Simply because it significantly alters the way consumers, industries, or businesses operate. According to the European Commission document titled Artificial Intelligence for Europe 2018, AI is a key disruptive technology that has just begun to reshape the world. The Government of the Republic of Serbia has also recognized the importance of AI for the further development of its economy and society and has prepared an AI Development Strategy for the period between 2020 and 2025. The first step has already been made: the Science Fund of the Republic of Serbia, after a public call, has selected and financed twelve AI projects. This year more than 200 scholars and practitioners authored and co-authored the 94 scientific and research papers that had been accepted for publication in the Proceedings. All the contributions to the Proceedings are classified into the following 11 sections: Information Systems and Technologies in the Era of Digital Transformation; Smart Business Models and Processes; Entrepreneurship; Innovation and Sustainable Development; Smart Environment for
