**Mind-Reading and Artificial Intelligence: Past, Present and Future** Prof. (Dr.) Jai Paul Dudeja, 2024-10-30 Mind reading typically refers to the ability of discerning or interpreting someone else's thoughts, feelings, or intentions. Mind Reading has two components: human-based and ii device-based artificial intelligence. Artificial Intelligence (AI) refers to programming computers to do tasks that normally require human intelligence, like learning, problem-solving, and understanding language. It is like giving computers the ability to think and make decisions on their own, similar to how humans do. AI helps machines learn from data, adapt to new situations, and perform tasks without being explicitly programmed for each step. This book covers the topics on human-based and device-based mind reading and interpretation of artificial intelligence, which is divided into 32 chapters and the following 8 sections: i Mind Reading and Artificial Intelligence Introduction and Overview, ii Human-Based Mind Reading, iii Artificial Intelligence Introduction, Types of Learning, iv Device-Based Mind Reading And Virtual Assistants, v Applications and Opportunities of Artificial Intelligence, vi Artificial Intelligence Ethical Issues, Risks, and Regulations, vii Artificial Consciousness, and viii Artificial Intelligence in India: Status and the Way Forward.
