Rethinking Education and Agency in the Age of Human-Generative AI Interaction Bozkurt, Aras, 2025-10-17 In the age of human generative AI interaction traditional educational practices are being challenged and redefined As AI systems become more integrated into learning teaching and creating questions arise about the role of human judgment creativity and autonomy in shaping knowledge Generative AI collaborates with users raising both opportunities for empowerment and concerns over dependency This relationship calls for a critical rethinking of educational models demanding approaches that integrate AI while cultivating human agency ethical awareness and complex navigation abilities Rethinking Education and Agency in the Age of Human Generative AI Interaction explores the implications of generative AI technologies on higher education It offers multidimensional analyses from social cultural psychological and economic standpoints challenging the notion of AI as a neutral tool and unpacking its ideologies biases and impacts on teaching learning and human agency This book covers topics such as personalized learning emotional intelligence and education policy and is a useful resource for educators computer engineers policymakers academicians researchers and scientists

Textbook of Artificial Intelligence for Class IX (A.Y. 2023-24)Onward Hema Dhingra, 2023-05-20 The term artificial intelligence may sound intimidating to some but it has been in use for decades and its applications are more common than you might imagine It is gaining the spotlight across applications in our personal and professional lives AI is still at a relatively early stage of development so that the range of potential applications have ample scope left for further development It holds the promise of solving some of the most pressing issues facing society but also presents challenges such as unethical use of data and potential job displacement There are so many amazing ways artificial intelligence and machine learning are used behind the scenes to impact our everyday lives A1 assists in every area of our lives whether we re trying to read our emails get driving directions get music or movie recommendations AI is a constellation of technologies that enable machines to act

with higher levels of intelligence and emulate the human capabilities of sense comprehend and act AI is not specifically related to computer science This is a field of study that encompasses human behaviour biology psychology and even language and linguistics AI presents opportunities to complement and supplement human intelligence and enrich the way people live and work Artificial Intelligence is being widely recognized to be the power that will fuel this future global digital economy Countries around the world are becoming increasingly aware of the potential benefits of developing and applying AI From SIRI to self driving cars artificial intelligence AI is progressing rapidly While science fiction often portrays AI as robots with human like characteristics AI can encompass anything from Google s search algorithms to IBM s Watson to autonomous weapons From Amazon shopping recommendations Facebook image recognition and personal assistants like Siri Cortana and Alexa your phone is becoming a portal to real world applications of artificial intelligence This book is a glimpse into the future that illustrates how AI will continue to transform our daily lives in the near future Digitalisation and the new technological possibilities that artificial intelligence AI brings are driving the biggest social and economic changes since the industrial revolution Without the right political economic and ethical framework conditions there is a risk of uncontrolled development and a negative impact of AI Artificial intelligence AI is doing a lot of good and will continue to provide many benefits for our modern world but along with the good there will inevitably be negative consequences The sooner we begin to contemplate what those might be the better equipped we will be to mitigate and manage the dangers While writing the book we have tried to keep the explanation simple with lots of examples and illustrations Lastly there is always a scope of improvement Thus it is a request to our esteemed readers to send the feedback and suggestions etc for the improvement of the book All your requests are welcome

We Have Never Been Human Juan de Dios Vázquez, 2025-06-30 *We Have Never Been Human Or Why We Have Always Been Something Else* boldly reimagines what it means to be human challenging the traditional notions that bind our identity to biology and culture From ancient mythologies to modern technologies this book reveals a dynamic ever evolving human identity shaped by external forces and technological advancements Blending insights from philosophy technology studies anthropology and cultural critique *We Have Never Been Human Or Why We Have Been Something Else* offers an interdisciplinary exploration of our constructed identities and what they portend for the future of society It raises essential questions How has technology reshaped our self perception Are humans fixed beings or are we endlessly evolving What ethical social and political challenges arise as we integrate with intelligent machines This book is a compelling read for those intrigued by the intersection of humanity and technology offering profound insights into the essence of what it means to be human or perhaps what it means to evolve beyond the human

Artificial Intelligence, Humans and the Law Henrik Palmer Olsen, Jacob Livingston Slosser, Salome Addo Ravn, Johan Eddebo, Jonas Hultin Rosenberg, 2025-10-31 This book takes up the contentious issue of artificial intelligence AI and more specifically the evolving nature of AI mindedness as a legal entity in society With the increasing potential of AI suggested by the recent surge in

creative and administrative tools and large language models there is a growing concern about the ethical and legal implications of incorporating AI into society As these systems become even more powerful and their ability to mimic human output grows the question of whether and how to attribute mental states to AI even in its most nascent form has become a pressing concern It is for example unclear what kind of mind AI might be capable of and therefore what the proper legal analogy might be for how we attribute reasoning capability intent responsibility liability agency and so on to it This book contributes to this new and important area by bringing together front line research from diverse fields on the topic of understanding AI mindedness and how it and our relationship to it might be regulated Through a collection of chapters written by experts from law public administration tort psychoanalysis philosophy linguistics computer science and political theory this volume offers an insightful examination of current research theoretical frameworks and practical applications that are shaping the AI human relationship This book will be of considerable interest to scholars and researchers working in legal theory socio legal studies law and technology and science and technology studies
