**AI Tools for the English Language Classroom** Nik Peachey, 2024-06-27 This book has been designed to act as a practical resource that should help you to get a better understanding of the kinds of AI tools that are available and how to use them in the English language classroom The book does this through a series of chapters focusing on tools for teachers tools for students and a collection of background reading All of the tools and reading texts in this book have tasks to accompany them that will help you orientate yourself to the materials and think more deeply and actively about how they can be used These tasks have been adapted from the online course version of the book in which participants can share opinions reflections and materials with each other I would encourage you to do the same even if you aren't part of the course Keep a journal and make notes as you work through the book and try the tasks Find another colleague you can talk to about the tasks and the example plans Seek out opportunities to interact with and discuss what you are learning with other teachers and with your students Use what you are learning to run formal or informal development sessions for other teachers The book also includes a link to download a free copy of The Digital Toolbox The Digital Toolbox is regularly updated and should help to keep you up to date with new developments and apps that are becoming available I hope you enjoy the book

*Surveillance Education* Nolan Higdon, Allison Butler, 2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education

**Critical AI in K-12 Classrooms** Stephanie Smith Budhai, Marie K. Heath, 2025-09-08 A practical guide for teachers and students navigating the complicated intersection of artificial intelligence education and justice Artificial intelligence is rapidly integrating into today's classrooms but unlike other new technologies AI has the potential to harm making it difficult

to take advantage of its benefits In *Critical AI in K 12 Classrooms* Stephanie Smith Budhai and Marie K Heath draw attention to the biases embedded within AI algorithms such as those powering OpenAI s ChatGPT and DALL E to guide students and teachers in developing strategies to best incorporate AI or not into equitable learning AI s reliance on existing data and knowledge systems means Black queer those with disabilities and other marginalized students are at greater risk of being harmed by built in limitations and bias Budhai and Heath show how to circumvent if not actively resist such harms as machine learning NLPs LLMS and GenAI enter the classroom with practical examples rooted in culturally sustaining abolitionist and fugitive pedagogies across disciplines Their practical guide creatively answers the concerns of educators committed to forward thinking yet fair instruction and the needs of students eager to use AI for just ends *Critical AI in K 12 Classrooms* meets the challenges of a key STEM technology with an eye toward cultivating a more just world Balancing responsible learning with the joy of discovery Budhai and Heath build a framework for AI instruction that all educators can confidently use
