companion text to Joan Monahan Watson's book for K-12 instructors *Learning with AI* leads educators through the uncharted territory of AI-powered education and the future of teaching and learning      *Research and Innovation Forum 2024* Anna Visvizi, Orlando Troisi, Vincenzo Corvello, Mara Grimaldi, 2025-07-26 This book features research presented and discussed during the Research Innovation Forum Rii Forum 2024. As such, this book offers a unique insight into emerging topics, issues, and developments pertinent to the fields of technology, innovation, and education, and their social impact. Papers included in this book apply inter- and multi-disciplinary approaches to query such issues as technology-enhanced teaching and learning, smart cities, information systems, cognitive computing, and social networking. What brings these threads of the discussion together is the question of how advances in computer science, which are otherwise largely incomprehensible to researchers from other fields, can be effectively translated and capitalized on so as to make them beneficial for society as a whole. In this context, Rii Forum and Rii Forum proceedings offer an essential venue where diverse stakeholders, including academics, the think-tank sector, and decision makers, can engage in a meaningful dialogue with a view to improving the applicability of advances in computer science.

Bots Nick Monaco, Samuel Woolley, 2022-05-10 Bots, automated software applications programmed to perform tasks online, have become a feature of our everyday lives, from helping us navigate online systems to assisting us with online shopping. Yet, despite enabling internet users, bots are increasingly associated with disinformation and concerning political intervention. In this ground-breaking book, Monaco and Woolley offer the first comprehensive overview of the history of bots, tracing their varied applications throughout the past sixty years and bringing to light the astounding influence these computer programs have had on how humans understand reality, communicate with each other, and wield power. Drawing upon the authors' decade of experience in the field, this book examines the role bots play in politics, social life, business, and artificial intelligence. Despite bots being a fundamental part of the web since the early 1990s, the authors reveal how the socially oriented ones continue to play an integral role in online communication globally, especially as our daily lives become increasingly automated. This timely book is essential reading for students and scholars in Media and Communication Studies, Sociology, Politics, and Computer Science, as well as general readers with an interest in technology and public affairs.

**Computer Aided Systems Theory--EUROCAST '93** Franz Pichler (Ing., Dr. phil.), Roberto Moreno-Díaz, 1994 This volume contains a selection of papers presented at the third European Computer Aided Systems Theory workshop EUROCAST '93 held in Spain in February 1993. The workshop emphasizes interdisciplinarity with the specific goal of creating a synergy between fields such as systems theory, computer science, systems engineering, and related areas. The contributions in this volume are strongly related to current problems in CAST research. They emphasize an engineering point of view concerning systems

theory Since the computer is an essential instrument in CAST research there are close relations to specific topics in computer science The papers are grouped into parts on systems theory and systems technology specific methods and applications
