shortage in a digital era. Can 100% remote work attract more qualified candidates? Huong Hoang Thien, 2023-05-25 Master's Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1.0 language English abstract

What will happen if there aren't enough talents to fill the market in the future due to the demographical change? This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany. An empirical study has been conducted as an online survey to gain an overview of Germany's 100% remote job market. In a fast-changing world, digital transformation has become an inevitable process for companies to adapt to new technologies and market trends. The digital transformation in Germany has been significantly impacted by the COVID-19 pandemic, positively and negatively. On the one hand, the pandemic forced German companies to embrace new technology more quickly and adapt to remote work. However, on the other hand, it pointed out Germany's weaknesses in digital infrastructures and cybersecurity. Additionally, many German companies face a shortage of workers due to digital transformation. Another reason that causes workforce shortage is demographical change. Companies cannot operate their business correctly, increase revenue, or drive innovations to survive in a competitive market without suitable candidates. Furthermore, the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences. Therefore, companies must know them and their work preferences to fill the workforce shortage gap. Remote working as a sub-trend of the mega-trend New Work has become the new standard for workers, especially since the pandemic. However, there aren't any specific regulations regarding remote work in Germany yet. In general, remote work provides workers, e.g., more freedom and a better work-life balance. Nevertheless, remote work also has the downside, such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers, less productivity outside of the office, etc. For companies offering remote work, it gives them complete access to the talent pools, including freelancers, as external workers, reducing costs due to fewer offices being more attractive to job seekers. But on the other side, remote leadership has become a big challenge for leaders. Furthermore, companies have to deal more with cyber security. When everything's going remotely, companies have become an easier target of cyber attacks.

The Everything Guide to Remote Work Jill Duffy, 2022-02-08 Discover the secret to being productive and successful, no matter where you are, with this essential guide to remote work. During COVID-19, working from home became the new normal. Now both employers and employees find that the remote work they were forced to adjust to may be well better financially, sustainably, and even in terms of overall morale and productivity. But working from home is not without its challenges. It can be difficult to eliminate distractions, strike a solid work-life balance, and maintain social connections that are crucial in the workplace. Whether you're trying to find and land a job from the comfort of your home, learning to manage a virtual team, or dream of living a digital nomad lifestyle, *The Everything Guide to Remote Work* has everything you need to be successful. You'll learn to optimize your own workplace culture, whether it's in your home office or a constantly changing backdrop. Wayne,2018-05-14 Academic Paper from the year 2018 in the subject Didactics Common Didactics Educational Objectives Methods language English abstract This work focuses on Future Education and its characteristics Thereby it will have a closer look at the advantages and disadvantages of Online Education Over the past several decades the rapid technological advancement has had an impact on every aspect of human life and education has been one of the most important beneficiaries of this phenomenon However as technology continues to take a central role in today s society educational

experts and professionals have raised concerns on the possible impacts that this will have not just on the system but also on the students and the society as whole Some critics arguing that technology would in the future replace human intelligence This they argue would be as a result of the assumption of control by technologies over a considerable measure of undertakings and capacities that educators have been educating their students in the conventional education system It is the position of this paper that despite the rise of technology and the central role it is now playing in the society Education faces no threat rather with the changing world technology will only be driving force behind the restructuring of the education model as it aligns itself to the global changes     The New Education in the Soviet Republic Al'bert Petrovich Pinkevich,1929
