*Handbook of Research on Barriers for Teaching 21st-Century Competencies and the Impact of Digitalization* Dhir, Harpreet Kaur, 2021-06-25 The need to develop 21st century competencies has received global recognition but instructional methods have not been reformed to include the teaching of these skills Multiple frameworks include creativity critical thinking communication and collaboration as the foundational competencies Complexities of planning curriculum and delivering instruction to develop the foundational competencies requires professional training However despite training instructional practice can be impacted by barriers caused by personal views of teachers economic constraints access to resources social challenges pandemic overwhelming pace of global shifts and other influences With digitalization entering the field of education it is unclear if technology has helped in removing or eliminating the barriers or has itself become another obstruction in integrating the competencies Gaining an educator's perspective is essential to understanding the barriers as well as solutions to mitigate the impediments through innovative instructional methods being practiced across the globe via digital or non digital platforms The need for original contributions from educators exists in this area of barriers to 21st century education and the role of digitalization The Handbook of Research on Barriers for Teaching 21st Century Competencies and the Impact of Digitalization discusses

teaching the 21st century competencies namely critical thinking creativity collaboration and communication This book presents both the problems or gaps causing barriers and brings forth practical solutions digital and non digital to meet the educational shifts The chapters will determine the specific barriers that exist whether political social economic or technological to integrating competencies and the methods or strategies that can eliminate these barriers through compatible instructional approaches Additionally the chapters provide knowledge on the impacts of digitalization in general on teaching and learning and how digital innovations are either beneficial to removing impediments for students or rather causing obstructions in integrating the four competencies This book is ideally intended for educators and administrators working directly with students educational researchers educational software developers policymakers teachers practitioners and students interested in how 21st century competencies can be taught while facing the impacts of digitalization on education
