Everyday Automation

Sarah Pink, Martin Berg, Deborah Lupton, Minna Ruckenstein, 2022-05-09 This Open Access book brings the experiences of automation as part of quotidian life into focus. It asks how, where and when automated technologies and systems are emerging in everyday life across different global regions. What are their likely impacts in the present and future? How do engineers, policy makers, industry stakeholders and designers envisage artificial intelligence (AI) and automated decision making (ADM) as solutions to individual and societal problems? How do these future visions compare with the everyday realities, power relations and social inequalities in which AI and ADM are experienced? What do people know about automation and what are their experiences of engaging with actually existing AI and ADM technologies? An international team of leading scholars bring together research developed across anthropology, sociology, media and communication studies and ethnology which shows how, by rehumanising automation, we can gain deeper understandings of its societal impacts. No need to dress up, brave the traffic and spend much of the day in a lifeless cubicle. Instead, you can work in peace from wherever you want, far from your nagging boss and interrupting colleagues. But working remotely comes with its own unique set of difficulties. Adjusting from an office with professionally dressed people all around you to working alone in your sweats with only your pets or a few family members as companions isn't an easy transition. Remote workers struggle with work-life balance, time management, productivity and loneliness. These challenges may make you question if remote work is feasible for you in the long term. Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates? Huong Hoang Thien, 2023-05-25 Master's Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1.0 language English abstract. What will happen if there aren't enough talents to fill the market in the future due to the demographical change? This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany. An empirical study has been conducted as an online survey to gain an overview of Germany's 100% remote job market. In a fast-changing world, digital transformation has become an inevitable process for companies to adapt to new technologies and market trends. The digital transformation in Germany has been significantly impacted by the COVID-19 pandemic, positively and negatively. On the one hand, the pandemic forced German companies to embrace new technology more quickly and adapt to remote work. However, on the other hand, it pointed out Germany's weaknesses in digital infrastructures and cybersecurity. Additionally, many German companies face a shortage of workers due to digital transformation. Another reason that causes workforce shortage is demographical change. Companies cannot operate their business correctly, increase revenue or drive innovations to survive in a competitive market without suitable candidates. Furthermore, the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences. Therefore, companies must know them and their work preferences to fill the workforce shortage gap. Remote working as a sub-trend of the mega-trend New Work has become the new standard for workers, especially since the pandemic. However, there aren't any specific regulations regarding remote work in Germany yet. In general, remote work provides workers, e.g., more freedom and a better work-life balance. Nevertheless, remote work also has the downside, such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers, less productivity outside of the office, etc. For companies, offering remote work gives them complete access to the talent pools, including freelancers, as external workers, reducing costs due to fewer offices being more attractive to job seekers. But on the other side, remote leadership has become a big challenge for leaders. Furthermore, companies have to deal more with cyber security. When everything's going remotely, companies have become an easier target of cyber attacks.

Psychology in Everyday Life David

G. Myers,2011-02-18 Creating an exceptionally student friendly textbook in psychology isn't just about making the chapters shorter and pages more colorful. It's about using that type of format to provide a clear portrait of psychological science: concise but not oversimplified, all while continually answering the recurring student question: "What does this have to do with me?" David Myers' brief introduction to psychology, *Psychology in Everyday Life*, certainly does offer brief, easily manageable chapters and a colorful, image-rich design, both shaped by extensive research, class testing, and instructor/student feedback. But what makes it such an exceptional text is what flows through those chapters: rich presentations of psychology's core concepts and field-defining research, examined in context of the everyday lives of all kinds of people around the world and communicated in the captivating storyteller's voice that is instantly recognizable as Myers'. The new edition of *Psychology in Everyday Life* offers an extraordinary amount of new research, effective new inquiry-based study tools, and further design innovations, all while maintaining its trademark brevity and clean layout. And it is accompanied by an innovative media supplements of the same scope as all of David Myers' more comprehensive textbooks.
