Industry Insights facilitate a deeper understanding of the link between what you are studying and how it is applied in industry. Datasets, questions, and exercises give you the opportunity to apply your learning. Dr Funmi Obembe is the Head of Technology at the Faculty of Arts, Science, and Technology, University of Northampton. Dr Ofer Engel is a Data Scientist at the University of Groningen.

Perspectives on Artificial Intelligence in Times of Turbulence: Theoretical Background to Applications Geadá, Nuno, Jamil, George Leal, 2023-11-17 *Perspectives on Artificial Intelligence in Times of Turbulence: Theoretical Background to Applications* offers a comprehensive exploration of the intricate relationship between artificial intelligence (AI) and the ever-changing landscape of our society. The book defines AI as machines capable of performing tasks that were once exclusive to human cognition. However, it emphasizes the current limitations of AI, dispelling the notion of sophisticated cyborgs depicted in popular culture. These machines lack self-awareness, struggle with understanding context, especially in language, and are constrained by historical data and predefined parameters. This distinction sets the stage for examining AI's impact on the job market and the evolving roles of humans and machines. Rather than portraying AI as a threat, this book highlights the

symbiotic relationship between humans and machines It recognizes that while certain jobs may become obsolete new opportunities will emerge The unique abilities of human beings such as relational skills emotional intelligence adaptability and understanding of differences will continue to be indispensable in a rapidly transforming society Its perspectives cover a wide range of topics such as business sustainability change management cybersecurity digital economy and transformation information systems management management models and tools and continuous improvement are comprehensively addressed Additionally the book delves into healthcare telemedicine Health 4 0 privacy and security knowledge management learning and presents real world case studies Designed for researchers and professionals seeking to enhance their knowledge and research capabilities this book offers a consistent theoretical and practical foundation It serves as a springboard for further studies supports change management initiatives within organizations and facilitates knowledge sharing among experts This book is an essential companion for colleges with master s and Ph D degree investigators and researchers across a wide range of disciplines *Surveillance Education* Nolan Higdon, Allison Butler, 2024-08-02

Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education *Government Response to Disruptive Innovation:*

Perspectives and Examinations Edwards, III, Sam B., Masterson, James R., 2023-05-15 With the increasing pace of disruptive innovation the world in general and governments in particular are experiencing challenges in adapting their systems to these new technologies While the focus is on disruptive industries these innovations also disrupt how governments regulate industries and technologies The regulatory and policy choices governments and other regulatory bodies make have a profound impact on the industry by decreasing or magnifying uncertainty Many of these disruptive technologies offer

opportunities and challenges to the way governments interact in their communities Government Response to Disruptive Innovation Perspectives and Examinations presents research and case studies on government responses to disruptive innovations from a wide array of countries It addresses the effects on the development of these innovations as a result of responses governments make Covering topics such as citizen partnerships communication technology development and government action this premier reference source is a dynamic resource for legal professionals activists government officials sociologists business leaders and executives students and educators of higher education librarians researchers and academicians

Working for a Future Lisette Nieves,Noel S. Anderson,Becca Huntting,2024-06-10 This book builds on the success of Working to Learn Palgrave Macmillan 2020 by focusing on the future of work and how young people especially low income young people and young people of color are pursuing college and career goals through work based learning experiences yet encountering an increasingly racially and socioeconomically stratified labor market and educational system Through policy analysis and case studies both from US and abroad the authors will present the argument for why these models warrant revisitation innovation and investment and elevate profiles of young workers nonprofits corporate partners and governments today who are using work opportunities to open doors once closed

The State of Food and Agriculture 2022 Food and Agriculture Organization of the United Nations,2022-11-01 Automation has been shaping world agriculture since the early twentieth century Motorized mechanization has brought significant benefits in terms of improved productivity reduced drudgery and more efficient allocation of labour but also some negative environmental impacts More recently a new generation of digital agricultural automation technologies has appeared with the potential to further enhance productivity as well as resilience while also addressing the environmental sustainability challenges driven by past mechanization The State of Food and Agriculture 2022 looks into the drivers of agricultural automation including the more recent digital technologies Based on 27 case studies the report analyses the business case for adoption of digital automation technologies in different agricultural production systems across the world It identifies several barriers preventing inclusive adoption of these technologies particularly by small scale producers Key barriers are low digital literacy and lack of an enabling infrastructure such as connectivity and access to electricity in addition to financial constraints Based on the analysis the publication suggests policies to ensure that disadvantaged groups in developing regions can benefit from agricultural automation and that automation contributes to sustainable and resilient agrifood systems
