Teaching Reading to American Indian/Alaska Native Students Jon Reyhner, 2001 **Resources in Education** ,1999-10

The Case for Critical Literacy Alice S. Horning, 2024-08-15 The Case for Critical Literacy explores the history of reading within writing studies and lays the foundation for understanding the impact of this critical yet often untaught skill. Every measure of students' reading comprehension, whether digital or analog, demonstrates that between 50 and 80 percent of students are unable to capture the substance of a full discussion or evaluate material for authority, accuracy, currency, relevancy, appropriateness, and bias. This book examines how college-level instruction reached this point and provides pedagogical strategies that writing instructors and teachers can use to address the problem. Alice Horning makes the case for the importance of critical reading in the teaching of writing with intentionality and imagination while sharing glimpses of her own personal history with reading and writing. Horning provides the context for understanding what college faculty face in their classrooms and offers a history of critical literacy that explains why, to date, it has mostly been neglected or ignored. The diverse statuses of students' reading challenges. The Case for Critical Literacy explores actionable options to better meet students' literacy needs. College and university faculty, especially writing instructors, will benefit from an understanding of what has happened in the field and what needs to change.

Productive, Not Polarizing Heather Kenyon Casey, This book, co-published with the National Science Teaching Association (NSTA), provides the support that K-12 teachers and students need for more complex science investigations. Drawing on research that informs effective literacy practices, this book pushes back on singular ideologies, programs, and divisive rhetoric and instead embraces an inclusive perspective for supporting literacy development and learning. Readers are encouraged to move beyond debates that divide us and look toward the hard but necessary work of building the partnerships needed to support all students. Productive Not Polarizing begins with a focus on community literacies and then describes effective literacy practices across grade levels. Designed for a wide audience, it will assist educators, families, and community partners to have informed conversations about what literacy instruction and learning involves. Every chapter includes a Community Snapshot describing a real-life scenario in which a partnering benefits students, an Ideas for Action section that can be adapted to your own context, reflection questions, and a list of helpful resources that include potential sources of funding.

Book Features: An accessible, positive discussion of literacy research and practices for educators, families, and community partners. A response to increasingly contentious conversations about literacy instruction. Guidance to help educators engage with key community partners and stakeholders such as administrators, families, childcare centers, afterschool programs, and local school boards. Opportunities to consider the role of teacher education and professional development in supporting school-community conversations. Ready-to-use resources such as reproducible materials and community planning and event guides.
