Indigenous Teaching Disciplines and Perspectives for Higher Education Kgari-Masondo, Maserole Christina, 2025-03-28 Literature indicates that

sociolinguists and educationists often claim multilingual practice and Africanizing and Indigenizing education will jeopardize national unity and social cohesion. Such claims delay the implementation of decolonization policies and the transformation of the curriculum under false assumptions. However, research reveals many Indigenous students struggle with higher educational content which is often presented through languages that are unfamiliar to them. This implies that there is a need to uncover resources that can assist in necessitating the implementation of Indigenous education globally and that all multilingual strategies in education must be based on quality mother tongue illustrative content as its foundation. As a result, further research on the subject is necessary to enhance teaching strategies that reach all Indigenous students. Indigenous Teaching Disciplines and Perspectives for Higher Education illustrates the need for the implementation of a decolonized teaching and learning curriculum with integrated resources as models. It explores how to improve Indigenous knowledge content and teaching methods. Covering topics such as cultural identity, African research methodology and Indigenous media, this book is an excellent resource for teachers, policymakers, school administrators, researchers, scholars, academicians and more.

Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates? Huong Hoang Thien, 2023-05-25. Master's Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting, grade 1.0. Language: English. Abstract: What will happen if there aren't enough talents to fill the market in the future due to the demographical change? This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany. An empirical study has been conducted as an online survey to gain an overview of Germany's 100% remote job market. In a fast-changing world, digital transformation has become an evitable process for companies to adapt to new technologies and market trends. The digital transformation in Germany has been significantly impacted by the COVID-19 pandemic, positively and negatively. On the one hand, the pandemic forced German companies to embrace new technology more quickly and adapt to remote work. However, on the other hand, it pointed out Germany's weaknesses in digital infrastructures and cybersecurity. Additionally, many German companies face a shortage of workers due to digital transformation. Another reason that causes workforce shortage is demographical change. Companies cannot operate their business correctly, increase revenue or drive innovations to survive in a competitive market without suitable candidates. Furthermore, the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences. Therefore, companies must know them and their work preferences to fill the workforce shortage gap. Remote working as a sub-trend of the mega-trend New Work has become the new standard for workers, especially since the pandemic. However, there aren't any specific regulations regarding remote work in Germany yet. In general, remote work provides workers e.g. more freedom and a better work-life balance. Nevertheless, remote work also has the downside, such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers, less productivity outside of the office, etc. For companies offering remote work, it gives them complete access to the talent pools, including freelancers, as

external workers reducing costs due to fewer offices being more attractive to job seekers But on the other side remote leadership has become a big challenge for leaders Furthermore companies have to deal more with cyber security When everything s going remotely companies have become an easier target of cyber attacks **Management** Angelo Kinicki,Denise Breau Soignet,2002 *Macmillan Encyclopedia of Computers* Gary G.
