Debugging By Thinking A Multidisciplinary Approach:

Debugging by Thinking Robert C. Metzger, 2004 Debugging by Thinking A Multi Disciplinary Approach is the first book to apply the wisdom of six disciplines logic mathematics psychology safety analysis computer science and engineering to the problem of debugging It uses the methods of literary detectives such as Sherlock Holmes the techniques of mathematical problem solving the results of research into the cognitive psychology of human error the root cause analyses of safety experts the compiler analyses of computer science and the processes of modern engineering to define a systematic approach to identifying and correcting software errors Language Independent Methods Examples are given in Java and C Complete source code shows actual bugs rather than contrived examples Examples are accessible with no more knowledge than a course in Data Structures and Algorithms requires A thought process diary shows how the author actually resolved the problems as they occurred Debugging by Thinking Metzger, 2001-01-01 Deeper Learning, Dialogic Learning, and Critical Thinking Emmanuel Manalo, 2019-09-30 Deeper learning dialogic learning and critical thinking are essential

capabilities in the 21st century environments we now operate Apart from being important in themselves they are also crucial in enabling the acquisition of many other 21st century skills capabilities such as problem solving collaborative learning innovation information and media literacy and so on However the majority of teachers in schools and instructors in higher education are inadequately prepared for the task of promoting deeper learning dialogic learning and critical thinking in their students This is despite the fact that there are educational researchers who are developing and evaluating strategies for such promotion The problem is bridging the gap between the educational researchers work and what gets conveyed to teachers and instructors as evidence based usable strategies This book addresses that gap in it leading scholars from around the world describe strategies they have developed for successfully cultivating students capabilities for deeper learning and transfer of what they learn dialogic learning and effective communication and critical thought They explore connections in the promotion of these capabilities and they provide in accessible form research evidence demonstrating the efficacy of the strategies They also discuss answers to the questions of how and why the strategies work A seminal resource this book creates tangible links between innovative educational research and classroom teaching practices to address the all important question of how we can realize our ideals for education in the 21st century It is a must read for pre service and in service teachers teacher educators and professional developers and educational researchers who truly care that we deliver education that will prepare and serve students for life Research on E-Learning and ICT in Education Thrasyvoulos
