Decision Modeling in Policy Management Springer, 2012-11-01 [Decision Modeling in Policy Management](#)
Giampiero E. G. Beroggi, 1997 *Decision Modeling in Policy Management* Giampiero Beroggi, 2013-12-01 The last decade has experienced major societal challenges at the intersection of technological systems and policy making. Prevalent examples are the liberalization of energy and telecommunications markets, the public aversion towards nuclear power plants, the development of high speed trains, the debates about global warming and sustainability, the development of intelligent vehicle systems, and the controversies concerning the location of waste depositories, airports, and energy systems. These challenges, coupled with the call from industry for a systems engineering oriented approach to policy analysis, motivated Delft University of Technology to launch the first European School of Systems Engineering Policy Analysis and Management (SEPA). The purpose was to educate engineering oriented policy analysts in bridging the gap between engineering systems and policy decision making processes, both for the public and private sector. Up to now, more than 500 first year students and 30 Ph.D. students have enrolled in the program. In 1993, I set up a class called Quantitative Methods for Problem Solving, which had to address the most relevant issues in decision making for policy management, such as linear and non-linear optimization, multiattribute utility theory, multicriteria decision making, concepts from game theory, outranking relations, and probabilistic influence diagrams.

Decision Models in Engineering and Management Patricia Guarnieri, 2015-01-05 Providing a comprehensive overview of various methods and applications in decision engineering, this book presents chapters written by a range of experts in the field. It presents conceptual aspects of decision support applications in various areas, including finance, vendor selection, construction process management, water management, and energy agribusiness production scheduling and control, and waste management. In addition to this, a special focus is given to methods of multi-criteria decision analysis. Decision making in organizations is a recurrent theme and is essential for business continuity. Managers from various fields, including public, private, industrial, trading, or service sectors, are required to make decisions. Consequently, managers need the support of these structured methods in order to engage in effective decision making. This book provides a valuable resource for graduate students, professors, and researchers of decision analysis, multi-criteria decision analysis, and group decision analysis. It is also intended for production engineers, civil engineers, and engineering consultants.

Policy Decision Modeling with Fuzzy Logic Ali Guidara, 2020-12-18 This book introduces the concept of policy decision emergence and its dynamics at the sub-systemic level of the decision process. This level constitutes the breeding ground of the emergence of policy decisions but remains unexplored due to the absence of adequate tools. It is a nonlinear complex system made of several entities that interact dynamically. The behavior of such a system cannot be understood with linear and deterministic methods. The book presents an innovative multidisciplinary approach that results in the development of a Policy Decision Emergence Simulation Model (PODESIM). This computational model is a multi-level fuzzy inference system that allows the

identification of the decision emergence levers This development represents a major advancement in the field of public policy decision studies It paves the way for decision emergence modeling and simulation by bridging complex systems theory multiple streams theory and fuzzy logic theory *The Decision Model* Barbara von Halle,Larry Goldberg,2009-10-27 In the current fast paced and constantly changing business environment it is more important than ever for organizations to be agile monitor business performance and meet with increasingly stringent compliance requirements Written by pioneering consultants and bestselling authors with track records of international success The Decision Model A Decision Models for Management Jack Byrd,L.
