Ferguson, 2007-03-12 Why do thoracic surgeons need training in decision making Many of us who have weathered harrowing residencies in surgery feel that after such experiences decision making is a natural extension of our selves While this is no doubt true correct de sion making is something that many of us have yet to master The impetus to develop a text on evidence based decision making in thoracic surgery was stimulated by a conference for cardiothoracic surgical trainees developed in 2004 and sponsored by the American College of Chest Physicians During that conference it became clear that we as thoracic surgeons are operating from a very limited fund of true evidence based information What was also clear was the fact that many of the decisions we make in our everyday practices are not only uninformed by evidence based medicine but often are contradictory to existing guidelines or evidence based recommendations The objectives of this book are to explain the process of decision making both on the part of the physician and on the part of the patient and to discuss speci c clinical problems in thoracic surgery and provide recommendations regarding their mana ment using evidence based methodology Producing a text that will purportedly guide experienced practicing surgeons in the decision making process that they are acc tomed to observe on a daily basis is a daunting task      *Decision Making in Thoracic Surgery* Wickii T Vigneswaran, John Odell, 2018-06-30 Presented in an algorithmic approach this book is a practical guide to thoracic surgery Beginning with discussion on preoperative physical examination the following sections cover surgery for different regions of the thoracic system based on step by step evaluation of patient history physical examination investigation and diagnosis leading to a decision on the appropriate surgical procedure The text covers the chest wall pleura mediastinum trachea lung and oesophagus with a final section on lung donation and transplantation Authored by recognised US based experts from Loyola University Health System Maywood IL and Mayo Clinic Jacksonville FL the text is further enhanced by clinical photographs diagrams and tables Key points Practical guide to decision making in thoracic surgery Presented in a step by step algorithmic approach Includes section on lung transplantation Recognised US based author team
