Decisions For Sale Corruption And Reform In Land Use And Building Regulation:

Decisions for Sale John A. Gardiner, Theodore R. Lyman, 1978 Prevention, detection, and correction of corruption in local government Theodore R. Lyman, Thomas W. Fletcher, John A. Gardiner, 1978 The Illicit and Illegal in Regional and Urban Governance and Development Francesco Chiodelli, Tim Hall, Ray Hudson, 2017-09-27

Discussions of the illicit and the illegal have tended to be somewhat restricted in their disciplinary range to date and have been largely confined to the literatures of anthropology criminology policing and to an extent political science However these debates have impinged little on cognate literatures not least those of urban and regional studies which remain almost entirely undisturbed by such issues This volume aims to open up debates across a range of cognate disciplines The Illicit and Illegal in Regional and Urban Governance and Development is a multidisciplinary volume that aims to open up these debates extending them empirically and questioning the dominant discussions of governance and development that have been rooted largely or entirely in the realm of licit and legal actors The book investigates these issues with reference to a variety of different geographical contexts including but not limited to places traditionally considered to be associated with illegal activities and extensive illicit markets such as some regions in the so called Global South The chapters consider the ways in which these questions deeply affect the daily lives of several cities and regions in some advanced countries Their comparative perspectives will demonstrate that the illicit and the illegal are an underappreciated structural aspect of current urban and regional governance and development across the globe The book is an edited collection of research informed essays which will primarily be of interest to those taking advanced undergraduate and taught postgraduate courses in human geography urban and regional planning and a range of social science disciplines that have an interest in urban and regional issues and issues related to crime and corruption

Corruption and Racketeering in the New York City Construction Industry New York State Organized Crime Task Force, Ronald Goldstock, 1991 This book Corruption and Racketeering In The New York City Construction Industry The Final Report of the New York State Organized Task Force lays out in close and compelling detail the intricate patterns of corrupt activities and relationships that for the better part of a century have characterized business as usual in the construction industry in America s largest metropolis The book is the end product of more than five years worth of investigation prosecutions and research by the New York State Organized Crime Task Force a unique agency that has set a national example for marrying law enforcement initiatives with comprehensive and exhausting analysis of the causes and dynamics of industrial racketeering This is a sobering analysis of the construction industry one of New York City s largest industries and in effect one of the city s most significant economic sectors In any given year during the 1980s billions of dollars of construction were being carried out at any one time The industry regularly employs more than 100 000 people in the city involving some one hundred union locals and many hundreds of general and specialty contractors as well as a large number of architects engineers and materials suppliers The book shows in great and provocative detail how organized

extortion bribery illegal cartels and bid rigging characterize construction in the city The basis for much of this crime is labor racketeering controlled or orchestrated by organized crime It reveals how this world of corruption affects not only the private sector but the city's vast public works program and it spells out the ways in which both organized crime and official corruption each sustain the dynamics of ongoing criminality Wrong doing on a massive scale is documented at length But this book is more than a recitation of extensive and systematic criminality The book recommends a number of plausible options for genuine reform Necessarily these are profound and radical solutions but everyone who reads this book will conclude that only profound and radical solutions could hope to solve such an entrenched and intractable crime problem **Decisions for**

Sale John A. Gardiner, Theodore R. Lyman, 1978 **Political Corruption** Arnold J. Heidenheimer, Michael Johnston, Victor T. LeVine, 2024-12-20 Are phenomena labeled as corrupt subject to systematic social science investigation or does corruption lie so much in the eye of the beholder as to frustrate serious analysis The editors of this volume which follows up an important earlier work on the same subject hold that the comparative perspective involving both comparisons over time and comparisons between systems is crucial if the study of corruption is to reach the point where it can be studied as a socio political phenomenon The studies of political corruption included here pertain to all areas of the world but especially to the United States Communist systems and Europe Most were published during the last fifteen years and some were written especially for the volume Although the editors are political scientists scholars from all social science disciplines as well as law history and communications are represented among the authors of the approximately sixty selections included in this volume The first of the book's four parts deals with changing conceptualization and definition in the study of corruption The second part examines the incidence of corruption in the context of political development and modernization The third part examines the special vulnerability of some local national and international systems to corrupt practices In the final part perceptions of corruptions are related to scandal and other social control efforts as well as to studies of the effect and consequences of corruption **Thinking about Political Corruption** Peter DeLeon, 1993 Peter deLeon argues that while it is often individuals who actually engage in political corruption it is the US political system that condones or encourages such actions Once this perspective is recognised one can begin to understand ways in which the costs of corruption might be alleviated

Electoral Corruption in Bangladesh Muhammad Akhter, 2017-11-30 This title was first published in 2001 Rigging elections in favour of those in power has become a common practice in Bangladesh Muhammad Yeahia Akhter focuses on the significance of elections in this ostensibly democratic state and portrays how electoral corruption has damaged the process of democratic consolidation The author reveals the failure of both civilian and military governments to obtain democratic legitimacy and or credibility through free and fair elections The study examines the relatively democratic but largely non transparent nature of electioneering under non partisan caretaker governments The study provides a source of understanding of fair electoral process for the politicians and electoral officials in Bangladesh and other democratizing
