

A photograph of a drafting machine, which is a precision instrument used for creating technical drawings. The machine has a large, flat, light-colored base plate with various scales and markings. A vertical ruler is positioned on the left side. A horizontal ruler is positioned across the middle. A drafting head, which is a small, dark, rectangular device with a circular dial, is mounted on the horizontal ruler. A red rectangular box is drawn around the drafting head and the horizontal ruler. The text "with Drafting Head" is written in red, slanted letters across the box. The machine is mounted on a black base with red handles.

101 Problems in Drawing-board Geometry Frederic Goodson Higbee, 1938 **Drawing-board Geometry** Frederic Goodson Higbee, 1938 **Mathematics for the Million: How to Master the Magic of Numbers** Lancelot Hogben, 1993-09-17 It makes alive the contents of the elements of mathematics Albert Einstein Taking only the most elementary knowledge for granted Lancelot Hogben leads readers of this famous book through the whole course from simple arithmetic to calculus His illuminating explanation is addressed to the person who wants to understand the place of mathematics in modern civilization but who has been intimidated by its supposed difficulty Mathematics is the language of size shape and order a language Hogben shows one can both master and enjoy **Manual of Drawing and Surveying** F. A. Brining, D. N. Avasia, 1913 **Mathematics For The Million** Lancelot Hogben, 1968 Explains mathematics from counting to calculus in the light of man's changing social achievements *Journal of Engineering Drawing*, 1953 General Catalog University of Missouri, 1909 American Machinist, 1887 **The VNR Concise Encyclopedia of Mathematics** W. Gellert, M. Hellwich, H. Kästner, H. Küstner, 2012-12-06 It is commonplace that in our time science and technology cannot be mastered without the tools of mathematics but the same applies to an ever growing extent to many domains of everyday life not least owing to the spread of cybernetic methods and arguments As a consequence there is a wide demand for a survey of the results of mathematics for an unconventional approach that would also make it possible to fill gaps in one's knowledge We do not think that a mere juxtaposition of theorems or a collection of formulae would be suitable for this purpose because this would overemphasize the symbolic language of signs and letters rather than the mathematical idea the only thing that really matters Our task was to describe mathematical interrelations as briefly and precisely as possible In view of the overwhelming amount of material it goes without saying that we did not just compile details from the numerous text books for individual branches what we were aiming at is to smooth out the access to the specialist literature for as many readers as possible Since well over 700000 copies of the German edition of this book have been sold we hope to have achieved our difficult goal Colours are used extensively to help the reader Important definitions and groups of formulae are on a yellow background examples on blue and theorems on red *The Canada School Journal*, 1884 **Annual Catalogue** Massachusetts Institute of Technology, 1916 Annual Catalog of the Municipal University of Akron and ...
