**The Implications of new Technology, particularly Artificial intelligence (AI) for International Politics** Malam Wasai, 2023-09-18 Submitted Assignment from the year 2023 in the subject Politics General and Theories of International Politics language English abstract Greater scrutiny is necessary because AI will have a significant impact on international relations such as putting new topics on the international agenda challenging geostrategic relations serving as a tool for diplomats and negotiators and creating new opportunities and concerns about protecting

human rights Scholars and diplomats have found it helpful to think about the different things that affect international relations by breaking them down into three levels of analysis individual state and international State level analysis examines the foreign policy behavior of states in terms of state characteristics For example some scholars say that all democracies behave a certain way they don t fight with other democracies Artificial intelligence impact governance As AI continues to evolve and permeate various aspects of our lives its implications for AI and how does it impact businesses AI artificial intelligence refers to machines that can perceive intelligence synthesize and infer information It is the science and engineering of intelligent machines that can mimic human intelligence to perform tasks and then on the information they collect improve themselves based AI is designed to significantly enhance human capabilities and contributions making it a valuable business asset

Drivers, Barriers and Social Considerations for AI Adoption in Supply Chain Management Dr. Johannes Hangl, 2025-01-14 Doctoral Thesis Dissertation from the year 2025 in the subject Business economics Supply Production Logistics grade magna cum laude Mendel University Business and Economics language English abstract The dissertation explores the integration of artificial intelligence AI with supply chain management SCM highlighting both opportunities and challenges It begins by discussing the current state of AI in SCM identifying research gaps and explaining foundational concepts like SCM complexities the Supply Chain Operational Reference Model SCOR and AI algorithms in SCM Using a structured methodology the study includes a detailed literature review survey design and expert interviews Key findings reveal that AI adoption in SCM is driven by increased efficiency improved decision making and cost reduction However barriers such as data quality issues resistance to change and lack of understanding and trust in AI are significant To overcome these barriers companies should involve all stakeholders focus on data quality and integrate AI solutions with existing processes The research emphasizes avoiding common mistakes in AI implementation such as neglecting explainability and transparency underestimating stakeholder involvement and rushing into large scale implementation without pilot projects It concludes with actionable guidelines for businesses on developing purchasing and implementing AI solutions in SCM These guidelines include prioritizing data quality enhancing technical expertise focusing on tangible business benefits and upholding ethical standards The dissertation also discusses the implications for academia and industry acknowledging limitations and suggesting future research directions It highlights the potential of AI to revolutionize areas like demand forecasting inventory optimization and transportation through advanced predictive analytics and integration with technologies like IoT blockchain and robotics The study underscores the importance of ethical AI implementation transparency and human AI collaboration to address SCM challenges effectively
