Decentralization Conditions For Success:

Annual World Bank Conference on Development Economics 1995 Michael Bruno, Boris Pleskovic, 1996 Annotation
The 1995 conference continued the tradition of holding a roundtable discussion related to the subject of the forthcoming annual World Development Report in this case economies in transition. The conference addressed four themes: redistribution with growth, demographic change and development aid, and development and fiscal decentralization. Among the articles included in the 1995 proceedings are: Argentina's Miracle From Hyperinflation to Sustained Growth, Domingo F. Cavallo and Guillermo Mondino; Inequality, Poverty and Growth: Where Do We Stand, Albert Fishlow; Government Provision and Regulation of Economic Support in Old Age, Peter Diamond; Is Growth in Developing Countries Beneficial to Industrial Countries, Richard N. Cooper; Fiscal Federalism and Decentralization: A Review of Some Efficiency and Macroeconomic Aspects, Vito Tanzi.

Institutional and Policy Analysis of River Basin Management, *Institutional and Policy Analysis of River Basin Management* William Andrew Blomquist, 2005. The authors describe and analyze management in the Murray Darling Basin of Australia, long regarded as a model for integrated river basin management. This interior basin of over 1 million km² in semi-arid southeastern Australia is defined by the catchment areas of the Murray and Darling Rivers and their tributaries. Water management issues include allocation, quality and dryland salinity. Because of Australia's federal governmental structure, institutional development has been more a matter of integrating state and local endeavors than decentralization of national authority. The Australian national government has little constitutional power over water resources. The five states in the basin make policy regarding water rights, discharge permits, fees and the construction and operation of physical structures. River management began on the Murray River in the 1920s under the terms of a tri-state agreement. As the scope of management widened to the entire basin, more states were added and the national government supported the creation of new arrangements for integrated water resource management with some provision for stakeholder participation. The dynamics of state, national authority over water policy and the emergence in recent years of numerous local level catchment organizations contribute to some uncertainty about the future course of basin management in this internationally renowned site. This paper, a product of the Agriculture and Rural Development Department, is part of a larger effort in the department to approach water policy issues in an integrated way. The study was funded by the Bank's Research Support Budget under the research project Integrated River Basin Management and the Principle of Managing Water Resources at the Lowest Appropriate Level. Calbick, Ariel Dinar, *Public Sector Reform in Developing and Transitional Countries* Christopher Rees, Farhad Hossain, 2013-09-13. Over recent decades decentralization

has emerged as a key Public Sector Reform strategy in a wide variety of international contexts Yet despite its emergence as a ubiquitous activity that cuts across disciplinary lines in international development decentralization is understood and applied in many different ways by parties acting from contrary perspectives This book offers a fascinating insight into theory and practice surrounding decentralization activities in the Public Sectors of developing and transitional countries In drawing on the expertise of established scholars the book explores the contexts achievements progress and challenges of decentralization and local governance Notably the contributions contained in this book are genuinely international in nature the chapters explore aspects of decentralization and local governance in contexts as diverse as Ghana Hong Kong India Indonesia Kazakhstan Morocco Tanzania Uganda and Viet Nam In summary by examining the subject of decentralization with reference to specific developing and transitional Public Sector contexts in which it has been practiced this book offers an excellent contribution towards a better understanding of the theory and practice of decentralization and local governance in international settings This book was published as a special double issue of the International Journal of Public Administration

Annual World Bank Conference on Development Economics ,1996 *Decentralization* United Nations. Division for Public Economics and Public Administration,2000 This publication arose from a UN Regional Conference entitled Decentralization Conditions for Success held in Yerevan Armenia from 26 to 28 April 1999 The report includes the Yerevan Declaration in which the participants from Central and Eastern Europe and the Commonwealth of Independent States acknowledged that inter alia decentralisation plays a catalytic role in the democratisation and in accelerating the transformation process of the economy and society of their countries *Latin American Education* Carlos Alberto Torres,2019-03-06 This book offers a relevant sample of the current research on Latin American education in comparative perspective In their introduction Torres and Puiggros two of the most recognized researchers of Latin American education draw from political sociology of education theories of the state history of education and deconstructionist theories to focus on changes in state formation in the region and its implications for the constitution of the pedagogical subject in public schools Throughout the different chapters the contributors present and analyze the most relevant topics research agendas and some of the key theoretical and political problems of Latin American education Institutional and Policy Analysis of River Basin Management ,2005 The authors describe and analyze river basin management in the Guadalquivir River Basin in Spain The Guadalquivir river flows westerly across southern Spain with nearly all of its 57 017 km² drainage area within the region of Andalusia Water management issues in this semi arid heavily agricultural but rapidly urbanizing region include drought exposure water allocation water quality and in some areas groundwater overdraft A river basin agency Confederacion Hidrografica del Guadalquivir or CH Guadalquivir has existed within the basin since 1927 but its responsibilities have changed substantially over its history For much of its life CH Guadalquivir s mission was water supply augmentation through construction and operation of reservoirs primarily to support irrigation under central government direction with little

provision for water user participation Following the Spanish political system's transformation and Spain's accession to the European Union water law and policy changes greatly expanded CH Guadalquivir's responsibilities and restructured it to incorporate representation of some basin stakeholders Although the basin agency's accomplishments in reservoir construction have been prodigious its record of performance with respect to its newer responsibilities has been mixed as have perceptions of its openness and responsiveness to basin interests other than irrigators This paper a product of the Agriculture and Rural Development Department is part of a larger effort in the department to approach water policy issues in an integrated way The study was funded by the Bank's Research Support Budget under the research project Integrated River Basin Management and the Principle of Managing Water Resources at the Lowest Appropriate Level When and Why Does It Not Work in Practice World Bank web site

Institutional and Policy Analysis of River Basin Management Anjali Bhat, Kikkeri Ramu, Karin E. Kemper, 2005 The authors describe and analyze an unconventional approach to river basin management in a developing country undergoing rapid economic political and institutional change The founding of the Brantas River Basin Management Corporation Perum Jasa Tirta I PJT 1 a national state owned company for river basin management initiated an emphasis on river basin management to operate and maintain existing infrastructure plan and implement the allocation of water and address problems that affect basin level water resources The Brantas River basin is located within the province of East Java in Indonesia It has an area of approximately 11 800 square kilometers and makes up 25 percent of East Java's land area The basin's population which amounts to nearly 15 million has increased by 53.4 percent over the past 30 years and represents 42.4 percent of East Java's population with a density of 1 249 per square kilometer A shift has taken place in Indonesia since the mid 1990s from emphasizing infrastructure development to strengthening institutional aspects hydrology flood fighting flood warning flood management and so on The institutional arrangement for water resources management in the Brantas basin through a state owned corporation is an interesting model PJT I has achieved results in implementing a reasonably good system of water allocation and management and a reliable flood forecasting system as well as maintaining major infrastructure in fairly good condition Managing water quality catchment conditions and the river environment however are the responsibility of many entities and there is need for greater coordination and authority to address these issues

Institutional and Policy Analysis of River Basin Management William Andrew Blomquist, 2005 The authors describe and analyze river basin management in the Guadalquivir River Basin in Spain The Guadalquivir river flows westerly across southern Spain with nearly all of its 57 017 km² drainage area within the region of Andalusia Water management issues in this semi arid heavily agricultural but rapidly urbanizing region include drought exposure water allocation water quality and in some areas groundwater overdraft A river basin agency Confederacion Hidrografica del Guadalquivir or CH Guadalquivir has existed within the basin since 1927 but its responsibilities have changed substantially over its history For much of its life CH Guadalquivir's mission was water supply augmentation through

construction and operation of reservoirs primarily to support irrigation under central government direction with little provision for water user participation Following the Spanish political system s transformation and Spain s accession to the European Union water law and policy changes greatly expanded CH Guadalquivir s responsibilities and restructured it to incorporate representation of some basin stakeholders Although the basin agency s accomplishments in reservoir construction have been prodigious its record of performance with respect to its newer responsibilities has been mixed as have perceptions of its openness and responsiveness to basin interests other than irrigators Verso cover 07304 01 01

Gender and Education for All Unesco,2003 The World Education Forum of April 2000 set gender equality as one of its important goals The target was to achieve parity in enrolment of girls and boys in primary education and secondary education by 2005 and full equality by 2015 This monitoring report shows that many countries will fail to make the 2005 target but circumstances could change quickly with appropriate policy changes However educational inequality is caused by deep rooted social forces and a wide range of economic and social changes are needed Decentralization ,2000 A New Perspective on Intergovernmental Fiscal Relations Machfud Sidik,2007 Lesotho Social Sciences Review ,2013-12
