Decision Making A Psychological Analysis Of Conflict Choice And Commitment:

Decision Making Irving Lester Janis, Leon Mann, 1977 **Decision Making** Irving L. Janis, Leon Mann, 1979 Decision Making Irving Lester Janis, 1979 *Rational Choice and Judgment* Rex Brown, 2005-04-22

The tools needed to make a better more informed decision Decision analysis DA is the logic of making a decision using quantitative models of the decider's factual and value judgments DA is already widely used in business government medicine economics law and science However most resources present only the logic and models rather than demonstrating how these methods can be effectively applied to the real world This book offers an innovative approach to decision analysis by focusing on decision making tools that can be utilized immediately to make better more informed decisions It uses no mathematics beyond arithmetic Examining how deciders think about their choices this book provides problem solving techniques that not only reflect sound modeling but also meet other essential requirements they build on the thinking and knowledge that deciders already possess they provide knowledge in a form that people are able and willing to provide they produce results that the decider can use and they are based on intimate and continuous interactions with the decider The methods outlined in this text take into account such factors as the use of the organization available data and subjective knowledge Replete with exercises case studies and observations from the author's own extensive consulting experience the book quickly engages readers and enables them to master decision analysis by doing rather than by simply reading Using familiar situations it demonstrates how to handle knowledge as it unfolds in the real world A term project is presented in the final chapter in which readers can select an actual decision making problem and apply their newfound tools to prepare a recommendation A sample report is provided in the appendix Beginning with qualitative structuring the text advances to sophisticated quantitative skills that can be applied in both public and private enterprise including Modeling decision making under conditions of uncertainty or multiple objectives Risk analysis and assessment Communicating and justifying controversial decisions Personal life choices and political judgments Adapting decision aid to organizations The book's broad applicability makes it an excellent resource for any organization or as a textbook for decision making courses in a variety of fields including public policy business management systems engineering and general education An Instructor's Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department Understanding the Impact of Emotional Stress on Crisis Decision Making Noel Allan Sawatzky, 2022-01-03

Motivational models are critical to understanding crisis decision making because leaders and their advisors are emotionally involved intent on reducing stress and motivated to find ways of advancing their interests while minimizing the risk of war The principal theoretical work on the subject is Irving Janis and Leon Mann's classic study of decision making published in 1977 While useful the book has a significant flaw Janis and Mann theorize that policy maker stress during crisis is derived from decision deliberation leading to a circular approach This book solves the identified problem by addressing circularity between the rise of psychological stress decision deliberation and

dysfunctional behavior with an independent measure of decision conditions using cognitive complexity With an effective independent measure of stress the key contribution of this volume is a reformulation of Janis and Mann s model to render the construct more rigorous and empirically useful to the present day study of crisis decision making **Organizational**
