Decision Making With Multiple Objectives:

Decisions with Multiple Objectives Ralph L. Keeney, Howard Raiffa, 1993-07 This book describes how a confused decision maker who wishes to make a reasonable and responsible choice among alternatives can systematically probe their thoughts and feelings in order to make the critically important trade offs between incommensurable objectives **Multi-Objective**

Decision Making Diederik M. Roijers, Shimon Whiteson, 2017-04-20 Many real world decision problems have multiple objectives For example when choosing a medical treatment plan we want to maximize the efficacy of the treatment but also minimize the side effects These objectives typically conflict e g we can often increase the efficacy of the treatment but at the cost of more severe side effects In this book we outline how to deal with multiple objectives in decision theoretic planning and reinforcement learning algorithms To illustrate this we employ the popular problem classes of multi objective Markov decision processes MOMDPs and multi objective coordination graphs MO CoGs First we discuss different use cases for multi objective decision making and why they often necessitate explicitly multi objective algorithms We advocate a utility based approach to multi objective decision making i e that what constitutes an optimal solution to a multi objective decision problem should be derived from the available information about user utility We show how different assumptions about user utility and what types of policies are allowed lead to different solution concepts which we outline in a taxonomy of multi objective decision problems Second we show how to create new methods for multi objective decision making using existing single objective methods as a basis Focusing on planning we describe two ways to creating multi objective algorithms in the inner loop approach the inner workings of a single objective method are adapted to work with multi objective solution concepts in the outer loop approach a wrapper is created around a single objective method that solves the multi objective problem as a series of single objective problems After discussing the creation of such methods for the planning setting we discuss how these approaches apply to the learning setting Next we discuss three promising application domains for multi objective decision making algorithms energy health and infrastructure and transportation Finally we conclude by outlining important open problems and promising future directions **Multiple Objective Decision Making - Methods and**

Applications S R Paidy, K Yoon, C -L Hwang, 1979-02-05 *Multiobjective Decision Making* Vira Chankong, Yacov Y Haimes, 2008-02-04 This first rate text explores the theory and methodology of systems engineering in evaluating alternative courses of action and associated decision making policies It treats criteria as multidimensional rather than scalar in the development of normative theories These contribute to a behavioral theory of decision making and provide guidance for exercising judgment An introductory discussion of the systemic approach to judgment and decision is followed by explorations of psychological value measurements utility classical decision analysis and vector optimization theory The second section chiefly deals with methods of assessing and evaluating alternatives including both noninteractive and interactive methods A taxonomy and a comparative evaluation of methods conclude the text *Decision-making with*

Jiuping Xu, Ziqiang Zeng, 2014-02-07 Decision has inspired reflection of many thinkers since the ancient times With the rapid development of science and society appropriate dynamic decision making has been playing an increasingly important role in many areas of human activity including engineering management economy and others In most real world problems decision makers usually have to make decisions sequentially at different points in time and space at different levels for a component or a system while facing multiple and conflicting objectives and a hybrid uncertain environment where fuzziness and randomness co exist in a decision making process This leads to the development of fuzzy like multiple objective multistage decision making This book provides a thorough understanding of the concepts of dynamic optimization from a modern perspective and presents the state of the art methodology for modeling analyzing and solving the most typical multiple objective multistage decision making practical application problems under fuzzy like uncertainty including the dynamic machine allocation closed multiclass queueing networks optimization inventory management facilities planning and transportation assignment A number of real world engineering case studies are used to illustrate in detail the methodology With its emphasis on problem solving and applications this book is ideal for researchers practitioners engineers graduate students and upper level undergraduates in applied mathematics management science operations research information system civil engineering building construction and transportation optimization

Haimes, Vira Chankong, 2012-03-29 The Sixth International Multiple Criteria Decision Making MCDM Conference is one of a biennial series that serve as a forum for exchange of the latest information and new developments in this rapidly growing field Participants are carefully chosen from among scholars and practitioners so that widely ranging perspectives and disciplines are represented this insures the dissemination of valuable new knowledge to those scholars policy makers and industrial analysts who will best utilize and share it both in developed and in third world countries The Sixth International MCDM Conference was held from June 4 to 8 1984 at Case Western Reserve University Cleveland Ohio The Conference program reflects the evolution of the field from infancy through adolescence to maturity as marked by the progression from single objective modeling and optimization to multiple objective decision making Because the theoreticians practitioners and students who attend these MCDM conferences necessarily have
