Debating Disney Douglas Brode, Shea T. Brode, 2016-06-30 With stakes in film television theme parks and merchandising Disney continues to be one of the most dominant forces of popular culture around the globe Films produced by the studio are usually blockbusters in nearly every country where they are released However despite their box office success these films often generate as much disdain as admiration While appreciated for their visual aesthetics many of these same films are criticized for their cultural insensitivity or lack of historical fidelity In Debating Disney Pedagogical Perspectives on Commercial Cinema Douglas Brode and Shea T Brode have assembled a collection of essays that examine Disney s output from the 1930s through the present day Each chapter in this volume represents the conflicting viewpoints of contributors who look at Disney culture from a variety of perspectives Covering both animated and live action films as well as television programs these essays discuss how the studio handles social issues such as race gender

and culture as well as its depictions of science and history Though some of the essays in this volume are critical of individual films or television shows they also acknowledge the studio's capacity to engage audiences with the quality of their work These essays encourage readers to draw their own conclusions about Disney productions allowing them to consider the studio as the hero as much as the villain in the cultural deliberation *Debating Disney* will be of interest to scholars and students of film as well as those with an interest in popular culture

Animation and America Paul Wells, 2002 Discusses the distinctiveness of the cartoon form as well as myriad other types of animation production and examines animation's importance as a barometer of the social conditions in which it is made and which it reflects back cover

The American Child Caroline Field Levander, Carol J. Singley, 2003 From the time that the infant colonies broke away from the parent country to the present day narratives of U.S. national identity are persistently configured in the language of childhood and family In *The American Child* A Cultural Studies Reader contributors address matters of race gender and family to chart the ways that representations of the child typify historical periods and conflicting ideas They build on the recent critical renaissance in childhood studies by bringing to their essays a wide range of critical practices and methodologies Although the volume is grounded heavily in the literary it draws on other disciplines revealing that representations of children and childhood are not isolated artifacts but cultural productions that in turn affect the social climates around them Essayists look at games pets adolescent sexuality death family relations and key texts such as *The Adventures of Huckleberry Finn* and the movie *Pocahontas* they reveal the ways in which the figure of the child operates as a rich vehicle for writers to consider evolving ideas of nation and the diverse role of citizens within it

Thinking Straight Chrys Ingraham, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company

Living in the Landscape Arnold Berleant, 1997 In *Living in the Landscape* Arnold Berleant explores new ways of thinking about how we live and might live in the landscapes that enfold us Through the concepts of aesthetic engagement and environmental continuity he proposes a new paradigm that offers a holistic approach to the meaning of place and places of meaning in our lives Although environmental aesthetics is linked in the popular mind to dramatic vistas and monumental landscapes the Grand Canyon for example Berleant is much more concerned with the commonplace settings of everyday life He argues that our active appreciation of or aesthetic engagement with the prosaic landscapes of home work local travel and recreation plays a vital role in our discovery of hidden continuities as well as pleasure and meaning in the places we inhabit Berleant begins with a general introduction to environmental aesthetics identifying the kinds of experience meanings and values it involves and describing its historical sources and the issues with which it is concerned In the rest of the book he spotlights new directions in the field as they relate to education community creativity and the sacred and provides an insightful analysis of negative environmental aesthetics Throughout he is both thoughtful and entertaining as evidenced in his extended critique of the post modern environment of Disney World Berleant addresses issues commonly associated with the environmental movement

e.g. preservation, pollution control and quality of life. But his study draws from a wide range of disciplines and for that reason should also appeal to scholars and students interested in art and aesthetics, landscape architecture and planning, urban and environmental design and cultural geography as well as environmental studies.

On Disney Ute Dettmar, Ingrid Tomkowiak, 2022-08-08. Disney This name stands not only for a company that has had global reach from its early days but also for a successful aesthetic programme and ideological positions that have had great commercial success but at the same time have been frequently criticised. Straddling traditionalism and modernism, Disney productions have proven adaptable to social discourses and technical and media developments throughout its history. This volume brings together scholars from several European countries to explore various dimensions that constitute Disney. In line with current media and cultural studies research, the chapters deal with human-human and human-animal relations, gender and diversity, iconic characters and narratives, Disney's contribution to cultural and visual heritage and transmedial and transfictional spaces of experience and practices of participation associated with Disney story worlds.

Science-fiction Studies, 2008

Deconstructing Disney's Diva Liske Potgieter, 2015

American Film and Politics from Reagan to Bush Jr Philip Davies, Paul Wells, 2002

Focusing on the two decades leading to the beginning of the 21st century, this collection examines central issues in American politics and society through the films of the period. Using everything from Oliver Stone to Disney, Clint Eastwood to John Sayles, *Jurassic Park* to *Dumb and Dumber*, the international array of authors explore a number of themes. These include the cinematic views of political institutions, of politically significant places, of the projection of major issues such as gender, family and race, and the cultural politics of the film makers themselves in America at the start of a new century.

The Illusion of Life 2 Alan Cholodenko, 2007. Collection of 16 essays on post World War II animation in Japan and the United States generated by The Life of Illusion Australia's second international conference on animation held in Sydney Mar 3-5 1995.

Turning the Page Fiona M. Collins, Jeremy Ridgman, 2006. Since the nineteenth century children's literature has been adapted for both the stage and the screen. As the twentieth century progressed, children's books provided the material for an increasing range of new media from radio to computer games, from television to cinema blockbuster. Although such adaptations are now recognised as a significant part of the culture of childhood and popular culture in general, little has been written about the range of products and experiences that they generate. This book brings together writers whose work offers contrasting perspectives on the process of adaptation and the varying transformations, social, historical and ideological, that take place when a text moves from the page to another medium. Linking all these contributions is an interest in the changing definition of children's literature and its target audience within an increasingly media-rich society.

Comic Art of the United States Through 2000, Animation and Cartoons John Lent, 2005. Provides information on U.S. and Canadian comic art, animation, caricature and gag, political, illustrative and magazine cartoons. Provides citations of books, chapters, articles and fugitive materials gleaned from a variety of sources worldwide, including many periodicals and journals.

Good Girls and

Wicked Witches Amy M. Davis, 2006 In *Good Girls and Wicked Witches* Amy M Davis re examines the notion that Disney heroines are rewarded for passivity Davis proceeds from the assumption that in their representations of femininity Disney films both reflected and helped shape the attitudes of the wider society both at the time of their first release and subsequently Analyzing the construction of mainly human female characters in the animated films of the Walt Disney Studio between 1937 and 2001 she attempts to establish the extent to which these characterizations were shaped by wider popular stereotypes Davis argues that it is within the most constructed of all moving images of the female form the heroine of the animated film that the most telling aspects of Woman as the subject of Hollywood iconography and cultural ideas of American womanhood are to be found

The Post-Utopian Imagination M. Keith Booker, 2002-01-30 In America the long 1950s were marked by an intense skepticism toward utopian alternatives to the existing capitalist order This skepticism was closely related to the climate of the Cold War in which the demonization of socialism contributed to a dismissal of all alternatives to capitalism This book studies how American novels and films of the long 1950s reflect the loss of the utopian imagination and mirror the growing concern that capitalism brought routinization alienation and other dehumanizing consequences The volume relates the decline of the utopian vision to the rise of late capitalism with its expanding globalization and consumerism and to the beginnings of postmodernism In addition to well known literary novels such as Nabokov's *Lolita* Booker explores a large body of leftist fiction popular novels and the films of Alfred Hitchcock and Walt Disney The book argues that while the canonical novels of the period employ a utopian aesthetic that aesthetic tends to be very weak and is not reinforced by content The leftist novels on the other hand employ a realist aesthetic but are utopian in their exploration of alternatives to capitalism The study concludes that the utopian energies in cultural productions of the long 1950s are very weak and that these works tend to dismiss utopian thinking as naïve or even sinister The weak utopianism in these works tends to be reflected in characteristics associated with postmodernism
