Drillers Journal ,1929 **Great Thoughts from Master Minds** ,1886 *Secrets, Lies, Betrayals* Maggie Scarf,2004-05-11

Reading Maggie Scarf's groundbreaking new book could change your life. In *Secrets, Lies, Betrayals*, the bestselling author of *Unfinished Business*, *Intimate Partners*, and *Intimate Worlds* brilliantly explores how the body holds on to painful episodes from the past, including secrets we may be keeping even from ourselves, and how we can release them to live freer, healthier lives. The body has a unique memory system in which early trauma and deeply buried feelings become woven into the fabric of our physical being. Certain events can trigger these body memories, which may then manifest themselves symptomatically as persistent anger, mood swings, headaches, muscle tension, and fatigue. These echoes from the past also cause destructive patterns in our lives and relationships. Why does a beautiful, successful woman like Claudia seek out abusive, explosively tense relationships in which she is forced to hide the truth about herself? Why does the presence of a strange woman's name in her husband's cell phone directory make Karen feel physically ill to the point where she cannot get through her daily life? And why does the author herself experience painful physical symptoms when she wrestles with contradictory memories of her mother? Exploring these and other personal narratives, Scarf reveals how the body, through its neurobiological systems, retains some of life's most important experiences and describes how new power therapies, such as reprocessing and psychomotor, have had immediate results where traditional therapies have had a lower success rate. Grounded in recent breakthroughs in mind-body science and drawing on Scarf's personal experiences, this book is a masterpiece of research, analysis, and insight into the human psyche and into human life.

Translation and the Poet's Life Paul Davis,2008-09-04 Between the Civil War and the early decades of the eighteenth century, English poets of the first rank devoted more of their time and creative energies to translating than they had ever done before or have ever done since. Paul Davis's *Translation and the Poet's Life* is the first study to range across the entirety of this golden age of poetic translation in England, taking as its organizing principle and object of inquiry the significance of translating itself as a distinctive mode of imaginative conduct. Composed of case studies of the five leading poet-translators of the age—John Denham, Henry Vaughan, Abraham Cowley, John Dryden, and Alexander Pope—it explores the part translation played in their lives as poets and thence in modelling the poet's life during what was a period of transition between early modern and modern constructions of it. The argumentative method of the book is metaphorical. Each chapter explores the impact on the theory and practice of the poet at issue of a metaphor or group of metaphors broadly current in contemporary translation discourse, in particular figurations of the translator as an exile, as a child, as a code breaker, and as a slave, and comparisons of translation to friendship, sexual congress, metamorphosis, and trade. The majority of these metaphors were wholly or potentially pejorative; translation remained a controversial practice throughout this period, widely depreciated and stigmatized. Turning translator accordingly, the five major poets considered in *Translation and the Poet's Life* undertook strenuous efforts of self-inquiry and self-presentation to find new answers to questions integral to their understandings of themselves and their standing in their culture, questions about
