**How Machine Learning is Innovating Today's World** Arindam Dey, Sukanta Nayak, Ranjan Kumar, Sachi Nandan Mohanty, 2024-07-23 Provides a comprehensive understanding of the latest advancements and practical applications of machine learning techniques Machine learning ML a branch of artificial intelligence has gained tremendous momentum in recent years revolutionizing the way we analyze data make predictions and solve complex problems As researchers and practitioners in the field the editors of this book recognize the importance of disseminating knowledge and fostering collaboration to further advance this dynamic discipline How Machine Learning is Innovating Today's World is a timely book and presents a diverse collection of 25 chapters that delve into the remarkable ways that ML is transforming various fields and industries It provides a comprehensive understanding of the practical applications of ML techniques The wide range of topics include An analysis of various tokenization techniques and the sequence to sequence model in natural language processing explores the evaluation of English language readability using ML models a detailed study of text analysis for information retrieval through natural language processing the application of reinforcement learning approaches to supply chain management the performance analysis of converting algorithms to source code using natural language processing in Java presents an alternate approach to solving differential equations utilizing artificial neural networks with optimization techniques a comparative study of different techniques of text to SQL query conversion the classification of livestock diseases using ML algorithms ML in image enhancement techniques the efficient leader selection for inter cluster flying ad hoc networks a comprehensive survey of applications powered by GPT 3 and DALL E recommender systems domain of application reviews mood detection emoji generation and classification using tokenization and CNN variations of the exam scheduling problem using graph coloring the intersection of software engineering and machine learning applications explores ML strategies for indeterminate information systems in complex bipolar neutrosophic environments ML applications in healthcare in battery management systems and the rise of AI generated news videos how to enhance resource management in precision farming through AI based irrigation optimization Audience The book will be extremely useful to professionals post graduate research scholars policymakers corporate managers and anyone with technical interests looking to understand how machine learning and artificial intelligence can benefit their work [Build A Business Around Your Curiosity: Learn, Build, Share, Sell, Repeat](#) Ahmed Musa, What if your curiosity wasn't a distraction but your greatest business asset This book is your permission slip to stop waiting for clarity and start building with what fascinates you Instead of following someone else's formula you'll discover how to turn your natural interests into powerful income engines without burning out faking expertise or locking yourself into one narrow niche You don't need to have it all figured out You don't need a perfect plan What you need is a loop learn something new build something small share it publicly offer it for sale and repeat That's how momentum builds That's how trust compounds And that's how modern creators are turning curiosity into

profitable businesses without losing themselves in the process. This approach works whether you're just getting started or reimagining your next chapter. It honors the way creative minds naturally work, driven by questions inspired by patterns and fueled by experimentation. You'll learn how to validate ideas by sharing your process, how to grow an audience by inviting them into your learning journey, and how to make money by offering simple, valuable products that emerge from what you've already explored. You don't need to commit to a single topic forever. You just need to commit to the loop: Curiosity leads to learning, Learning leads to building, Building leads to sharing, Sharing leads to sales. Sales fund your next round of curiosity. The old business model says you need to know everything upfront. The new business model says start with what you're curious about and let that be more than enough. This is the book for creative minds ready to turn their questions into income and their interests into impact. Learn. Build. Share. Sell. Repeat.

*Scientific Publishing Ecosystem* Payal B. Joshi, Prathamesh P. Churi, Manoj Pandey, 2024-08-01. The book aims to converge the perspectives of authors, editors, and reviewers to discuss modern scientific publishing practice and emerging concerns in the contemporary world. Authors, editors, and reviewers form a triage in a publishing ecosystem which is witnessing a huge pressure due to changing evaluation criteria for career progression and grant funding. The major perspective of this book is to put forth the present-day emerging ills of modern publishing system and sensitize the research fraternity, be it young researchers or established scientists, towards practicing good science and preserving spirit of scientific discoveries. The edited book consists of three parts: viz. Part I: Authors. Authorship and Scholarly Dissemination features ten chapters devoted to describe authorship issues and good publication practice, plagiarism concerns, preprints, open access models, conflicting interests, rise of review papers, writing book reviews, and assessing faculty beyond metrics. Part II: Editors. Editorial Desks and Issues of Scientific Misconduct features eight chapters devoted to discuss issues of editorial misconduct, desk rejections, paper mills, letters to editors, image duplication, emerging ChatGPT in writing, reviewing spaces, citation cartels, and retractions. Finally, Part III: Reviewers and Developing Evaluator's Eye features five chapters devoted to discuss peer review as an idea-creating model, paying peer reviewers, training reviewers, peer review manipulations, and peer review in age of AI. All chapters in the book are written by expert contributors of the field that provides a systematic approach of understanding various challenges, opportunities, and ethical considerations of scientific publishing ecosystem. Most of the chapters have featured recent cases of scientific misconduct as examples to reflect scale of the problem. This book will serve as a reference to research practitioners in understanding assigning authorship on papers, modern-day publishing collaboration, role of editors to serve journals in a holistic manner, and ensuring fair peer review mechanisms.
