[Critical Literacy in an AI](#)

World Kathy A. Mills, Amanda Gutierrez, 2025-12-18 Critical Literacy in an AI World is an innovative book that uses critical literary perspectives to examine generative AI. It provides thought-provoking insights into advancements in artificial intelligence which are increasingly entangled in human decision making across all spheres of society, profoundly reshaping literacy and media practices. Mills and Gutierrez analyse how these transformations affect and are affected by the evolving nature of human knowledge, consciousness, creativity, emotion, ethics, and aesthetics. They highlight the importance of critical literacy for understanding and even reclaiming the power dynamics operating in the social construction of the human experience within AI-driven texts and technologies. This book encourages readers to critically navigate computational algorithms and agents that mediate digital social practices and daily life. Blending theoretical frameworks and practical applications, it advances students' critical AI-based digital reading and authoring skills, as well as teachers' capabilities to use critical pedagogies, curricula, and assessment for reflective AI text environments. Critical Literacy in an AI World is essential reading for students and researchers in literacy and educational technology.

Humanising Language Education in the Generative Artificial Intelligence Age J  r  mie Bouchard, 2026-01-26 Examining the presence and influence of GenAI in the contexts of English for Academic Purposes (EAP) and written composition within university-level English as a foreign language (EFL) programmes, this book asserts a humanist view of language education informed by critical realism and the social realist philosophy of education. J  r  mie Bouchard looks at the GenAI language education interaction through explicit philosophical engagement with the aim of strengthening a critical and emancipatory approach to EAP written composition and language education. By highlighting technological determinism and relating it to broader neoliberalist mechanisms, the book provides new insights into the social, political, economic, cultural, and historical contexts within which the use of GenAI technologies by language teachers and learners can be understood. *Humanising Language Education in the Generative Artificial Intelligence Age* will appeal to students and scholars of linguistics, education, and sociology, as well as organisations devoted to understanding the evolution, application, and impact of GenAI on education and language learning.
