The Case for Critical Literacy Alice S. Horning, 2024-08-15 *The Case for Critical Literacy* explores the history of reading within writing studies and lays the foundation for understanding the impact of this critical yet often untaught skill Every measure of students' reading comprehension whether digital or analog demonstrates that between 50 and 80 percent of students are unable to capture the substance of a full discussion or evaluate material for authority accuracy currency relevancy appropriateness and bias This book examines how college level instruction reached this point and provides pedagogical strategies that writing instructors and teachers can use to address the problem Alice Horning makes the case for the importance of critical reading in the teaching of writing with intentionality and imagination while sharing glimpses of her own personal history with reading and writing Horning provides the context for understanding what college faculty face in their classrooms and offers a history of critical literacy that explains why to date it has mostly neglected or ignored the diverse statuses of students' reading challenges *The Case for Critical Literacy* explores actionable options to better meet students' literacy needs College and university faculty especially writing instructors will benefit from an understanding of what has happened in the field and what needs to change

Empowering India Through Digital Literacy (Vol. 1) Dr. R. Babu, Dr. S. Kalaivani & Dr. K. Saileela, 2019-04-26 Traditionally education is centered on sources such as schools teachers and print media The learners reached the information sources by enrolling with schools teachers and libraries Prior to the digital era information was not accessible by the majority of people and even those accessed were unable to obtain current information with respect to today's context The modern society wants to know the information as it happens and when it happens and the world is moving from an information society to a knowledge society Thus education is given the highest priority and brainpower is becoming the most valuable asset of an organisation Advances in digital technology have opened up many avenues of learning Technology has made information accessible transmittable from anywhere and by to all groups of people The higher education landscape is changing rapidly challenging academic professionals to think critically about

their roles in the field **American Inventor** ,1907 *Stenographer and Phonographic World* ,1890 **The Digital Future of English** Simone Murray,2025-07-18 More than any other academic discipline literary studies is the creation of print culture How then can it thrive in the digital era Early 1990s predictions of the book s imminent demise presented a simplistic either or choice between the legacy of moribund print and triumphalist digital technology Yet we have grown to experience the two media as complexly interdependent and even complementary Clearly digital does not kill print But literary studies in the digital era cannot simply resume business as usual It is urgently necessary to reconsider the discipline s founding assumptions in light of digital technology The digital era prompts a rethinking of literary studies object of study as well as its methods theories audiences and pedagogical practices What counts as literature necessarily shifts in an age of proliferating born digital texts and do it yourself DIY online publication Where should literary studies sit institutionally and how might it graft contextually oriented social sciences methods onto its traditionally humanistic mode of textual analysis Why should literary study continue to marginalize emotional responses to texts when online communities bond via readerly affect Who is the audience for literary criticism in an age where expertise is routinely challenged yet communication with global book loving publics has never been technologically easier Finally how can we utilize digital tools to rejuvenate literary studies pedagogy and help English staff better connect with millennial age students Literary studies has been convulsed for decades by debates over electronic literature and more recently digitally aided distant reading But these discussions still mostly confine themselves to demarcating our proper object of study We need to think more expansively about digital technology s impact on the underpinning tenets of the discipline Literary Media Studies is pitched at fellow literary scholars book historians media theorists cultural sociologists digital humanists and those working at the interface of these converging disciplines It models constructive engagement with contemporary digital culture Most importantly it brings a burst of sorely needed optimism to the question of literary studies digital future **Scientific American Building Monthly** ,1900
