How To Get Into Remote Customer Service Jobs Ideas With Low Investment:

Regional Policy Ugo Fratesi, 2023-11-08 Regional policy is an essential in any government's toolkit for promoting socioeconomic prosperity. It comes in many forms and can be used to target the development of weak and stronger regions. This textbook provides comprehensive and systematic coverage of regional policy, dealing with core theories and looking at contemporary challenges in practice, addressing regional policy across the world. Structured in four parts, the book opens with an exploration of regional policy's characterisation, aims, and rationale. The second part is devoted to issues of implementation and the instruments available to policymakers for intervention. The third part addresses regional policy evaluation, as well as statistics and modelling in policymaking. Finally, the book discusses how regional policy is applied in different contexts. Each chapter contains real-life examples of a regional policy topic in action and highlights supplementary topics for advanced readers. With its broad coverage of the subject, *Regional Policy: Theory and Practice* will prove a valuable resource for advanced students, researchers, and practitioners in regional policy, regional economics, economic geography, planning, and public policy.

Innovation Sucks! Alan Watkins, Simon May, 2021-03-14 Businesses spend billions on innovation with very little to show for their investment or effort. This book challenges some of the ingrained truths of innovation and suggests a different approach. Innovation is not the creation of a novel idea. It is the successful commercialisation of that novel idea. Rather than starting with a costly time-consuming problem assessment that seeks to push potential solutions through an innovation funnel, an impeller approach starts with possible solutions and gets the market to pull the best ones forward so they can fail fast or flourish fast. This approach is made possible by the addition of a bee, a new type of integrative thinker who can harvest the existing knowledge from the meadow of experts. Completely reversing the innovation process means organisations are much better placed to win in the market rather than focusing on finding theoretical solutions or clearing innovation stage gates. In addition, this approach also recognises that the people who shepherd the solution through the ideation and testing stage are not the same people who must then take that solution to market for successful commercialisation. Given the current innovation failure rate coupled with the fact that society is beset with multiple wicked problems, it's time to think differently and innovate innovation itself. This book is essential reading for Heads of Innovation and Commercialisation, Directors of Marketing, Heads of New Product Development and New Service Development Strategy, Directors, Chief Technology Officers, Government advisers, and policy makers.
