*Climate Change Solutions and Environmental Migration* Anna Ginty, 2021-04-20 This book lifts the taboo on maladaptation a different driver of environmentally induced migration which shines a light on the negative consequences arising from the solutions to climate change adaptation and mitigation policies Through a systematic analysis and critique of existing mitigation and adaptation policies under the United Nations Framework Convention on Climate Change UNFCCC and international development community and supplemented by a small empirical study in Indonesia this

book catalogues how maladaptation is manufactured under existing climate change solutions It posits that customary communities in general and women in particular are disproportionately affected by the dominant market driven logics that underscore current climate change solutions adopted by the UNFCCC The injustice of maladaptation is highlighted as multi faceted and explored using political economic social and ecological lenses and the concept of environmental reintegration is also explored as a possible solution to this issue Further possibilities are then presented in the Afterword as a combination of what the new post neoliberalism conjuncture could potentially look like This volume will be of great interest to students scholars and practitioners of climate change environmental policy environmental migration and displacement development studies I NGOs and civil society actors and activists more broadly *Library Issues* ,2007 **Canadian Business** ,2007
