to be self employed in this society because you have to rely on the wills of others and your courage to set up your business. However, it is not impossible and there are different ways to be self employed which can provide you with more freedom and flexibility while still bringing in some money. If you want to work at home, then this is the technology which is enabling the change and it is allowing nomads to work from home. Companies are recognising the potential of this new method of working and the first areas to embrace the new way of working are the legal ones. However, it is not just the legal firms and public sector which are looking to employment technology in order to cut costs. Almost every type of industry is looking at using technology in order to lower costs and in this way increase profits. For example, restaurants are using recruitment technology in order to lower salaries and costs. Until a few years ago, when every restaurant had a fixed cost of hiring, training and maintenance, the vast majority of restaurants were able to pay 100% of their employees' salaries. This meant that it was possible to pay a manager less than a waiter and save money. However, with the inclusion of recruitment technology, the cost of hiring employees is being cut by up to 50%. This does not necessarily mean that the amount of profit is increased, but employees are able to be assigned to different tasks, meaning that they spend less time in front of customers, thus increasing their profits.
