Doing Research With Children:

Doing Research with Children Anne D Greig, Jayne Taylor, Tommy MacKay, 2012-11-16 This Third Edition of Doing Research with Children is a practical introduction to the process of designing and writing up research with children and young people. At the centre is a commitment to engaging with children and young people as active research participants rather than as passive subjects. In the new edition you will find up to date information on the fast changing political and ethical debates around research with children and young people as well as guidance on how to carry out research yourself. Divided into three sections the new edition covers the main theories and approaches of research with children and young people, expanded guidance on research ethics, techniques for conducting both qualitative and quantitative research, more on analysing your research, a brand new chapter on communicating your research findings. This is a must have guide for students and practitioners who are engaging in research with children and young people. Doing Research with Children Dr Anne D Greig, Mrs Jayne Taylor, Tommy MacKay, 2007-02-08 The Second Edition of Doing Research with Children is a welcome development of this key textbook for a growing market. The book continues to provide a comprehensive and practical introduction to undertaking a research project with children and now accommodates and accounts for many of the changes that have taken place in research practice and in discussions about research with children in recent years. **Doing Research with Children and Young People** Sandy Fraser, Open University, 2004 Publisher description Introduces researchers to the key considerations involved in working with children and young people. The book highlights issues which arise at different stages in the process and which all researchers need to take account of as they plan and carry out a study. These include ethical and legal issues, philosophical underpinnings of research, age and diversity of the children involved and evaluation and dissemination of findings. **Practical Research with Children** Jess Prior, Jo Van Herwegen, 2016-06-03 Practical Research with Children is designed to help the reader understand techniques for research with children based on real world experience. The book describes a wide range of research methods focusing equally on quantitative and qualitative approaches and considers how different methods can be integrated. It highlights the benefits and challenges of each method and gives emphasis to best practice with expert guidance on how to avoid potential pitfalls in order to obtain valuable insights into how children develop. The volume includes fifteen chapters arranged over three sections. Each chapter explores a particular method or combination of methods and discusses both theoretical and practical issues using a diversity of domains including different ages, cultures, populations and settings. Uniquely the book includes newer methods such as eye tracking and digital technologies alongside well established behavioural methods which are used for research with children. With contributions from internationally renowned researchers and practitioners from a range of disciplines the book will be indispensable reading for a wide audience including for students in psychology, education and nursing undertaking research projects with children and also for anyone looking to understand the research behind current theories in child development.
