From Fingers to Digits Margaret A. Boden, Ernest A. Edmonds, 2019-07-16 Essays on computer art and its relation to more traditional art by a pioneering practitioner and a philosopher of artificial intelligence In *From Fingers to Digits* a practicing artist and a philosopher examine computer art and how it has been both accepted and rejected by the mainstream art world In a series of essays Margaret Boden a philosopher and expert in artificial intelligence and Ernest Edmonds a pioneering and internationally recognized computer artist grapple with key questions about the aesthetics of computer art Other modern technologies photography and film have been accepted by critics as ways of doing art Does the use of computers compromise computer art s aesthetic credentials in ways that the use of cameras does not Is writing a computer program equivalent to painting with a brush Essays by Boden identify types of computer art describe the study of creativity in AI and explore links between computer art and traditional views in philosophical aesthetics Essays by Edmonds offer a practitioner s perspective considering among other things how the experience of creating computer art compares to that of traditional art making Finally the book presents interviews in which contemporary computer artists offer a wide range of comments on the issues raised in Boden s and Edmonds s essays

Visual Environmental Communication Anders Hansen, David Machin, 2016-03-17 In 2008 the editors published a well cited journal paper arguing that while scholarly work on media representations of environmental issues had made substantial progress in textual analysis there had been much less work on

visual representations This is surprising given the increasingly visual nature of media and communication and in light of emerging evidence that the environment is visualized through the use of increasingly symbolic and iconic images Addressing these matters this volume marks out the present state of the field and contains chapters that represent fresh and exciting high quality scholarly work now emerging on visual environmental communication These include a range of fascinating and often alarming topics which draw on a variety of methods and forms of visual communication The book demonstrates that research needs to think much more widely about what we mean by the visual which plays a massive yet under researched role in the politics and ideology of public understanding and misunderstanding of and the environment and environmental problems The book is of relevance to students and researchers in media and communication studies cultural studies film and visual studies geography sociology politics and other disciplines with an interest in the politics of visual environmental communication This book was published as a special issue of Environmental Communication A Journal of Nature and Culture
