Dominance And Affection The Making Of Pets:

Dominance and Affection Yi-Fu Tuan, 1984 Tuan does a masterful job exploring the condescending human treatment of animals as playthings that exist only for our entertainment. He charts the malevolent history of male domination over women and children and the sad chronicle of slaves, dwarfs and other freaks treated as human appliances or toys. This provocative study of power in the world of pleasure play and art is a tour de force. Cultural Information Service. A brilliant book that will appeal to a wide audience. The volume provides excellent material for school and college seminar debates on humankind's place in nature and attitudes toward other living things. A penetrating analysis. Readable at all levels. Animal Geographies Jennifer Wolch, Jody Emel, 1998-09-17 Each year billions of animals are poisoned, dissected, displaced, killed for consumption or held in captivity usually for the benefit of humans. The animal world has never been under greater peril and this broad ranging collection contributes to a much needed fundamental rethinking about our relation with it. *Animal Geographies* explores the diverse ways in which animals shape the formation of human identity. Essays on zoos and wolves for example reveal how animals figure in social constructions of race, gender and nationality. From questions of identity and subjectivity it moves to a consideration of the places where people and animals confront the realities of coexistence on an everyday basis by way of case studies of species such as mountain lions and the golden eagle. It then examines the ways in which animals figure in the ongoing globalization of production and mass consumption illustrated by essays on the US meatpacking industry and meat production in the Indian state of Rajasthan and finally takes up legal and ethical approaches to human animal relations. *Animal Geographies* compels a profound rethinking of the nature of human animal relations and offers a series of proposals for reconstituting this relationship on a progressive basis. Contributors: Kay Anderson, Glen Elder, Andrea Gullo, Unna Lassiter, William S. Lynn, Suzanne M. Michel, Chris Philo, James D. Proctor, Paul Robbins, Frances M. Ufkes, James L. Wescoat Jr.

Animal Entanglements Erika Cudworth, 2024-04-01 This book provides an insight into the everyday lives and experiences of people who live with dogs as companions and glimpses aspects of the lives of the dogs who share their homes. It is framed sociologically and as such considers the various forms of power relations which shape the lives of those kept as pets and their human owners. In recounting stories of companion humans and dogs the co-constituted quality of life is clear. However, while dogs as agential beings with needs, desires and a point of view are able to shape outcomes and change aspects of their lived experience, the world they inhabit is profoundly geared to human inhabitants and the most privileged ones at that. The book revisits the notion of pet keeping as the interplay between domination and affection, arguing that these do not exist as a continuum but a mesh of complex relations played out in the use of homespace in the kitchen, the bedroom.

the in the public world of park and the street Those living with dog companions as well as the dogs themselves find their lives are muddled both literally and figuratively boundaries are tested and recast and the complications of inter species cohabitation negotiated by all parties Through an innovative theoretical contribution Cudworth conceptualizes human relations with companion dogs in terms of complex social relations that involve both systemic forms of domination as well as nonhuman agency in shaping social relations and social forms Animals, Animality and Controversy in Modern Welsh Literature and Culture Linden Peach,2022-11-15 This is the first study of the representation of animals and animality in Welsh literature It introduces the reader to key ideas and concepts from the new and fast growing field of animal studies and suggests how Welsh rural and urban history might be redrawn from the perspective of animals and their agenda It provides new and exciting insights into a range of Welsh writings about animals and examines how Welsh literature explores ways of thinking about intelligence sensibilities and knowledge from an animal perspective The book introduces readers to the concept of a relational universe in which all life is bound together through a network of relations and connections and illustrates its importance to animal studies and Welsh writing Ecology and Chinese-Language Cinema Sheldon H. Lu,Haomin Gong,2019-10-10 This edited collection explores new developments in the burgeoning field of Chinese ecocinema examining a variety of works from local productions to global market films spanning the Maoist era to the present The ten chapters examine films with ecological significance in mainland China Hong Kong and Taiwan including documentaries feature films blockbusters and independent productions Covering not only well known works such as Under the Dome Wolf Totem Tie Xi Qu West of the Tracts and Mermaid this book also provides analysis of less well known but critically important works such as Anchorage Prohibited Luzon and Three Flower Tri Color The unique perspectives this book provides along with the comprehensive engagement with existing Chinese and English scholarship not only extend the scope of the growing field of ecocinematic studies but also seeks to reform the means through which Chinese language eco films are understood in the years to come Ecology and Chinese Language Ecocinema will be of huge interest to students and scholars in the fields of Chinese cinema environmental studies media and communication studies The Animal's Agenda ,1985 **The Others** Paul Shepard,1997-03 Paul Shepard has been one of the most brilliant and original thinkers in the field of human evolution and ecology for more than forty years His thought provoking ideas on the role of animals in human thought dreams personal identity and other psychological and religious contexts have been presented in a series of seminal writings including Thinking Animals The Tender Carnivore and the Sacred Game and now The Others his most eloquent book to date The Others is a fascinating and wide ranging examination of how diverse cultures have thought about reacted to and interacted with animals Shepard argues that humans evolved watching other animal species participating in their world suffering them as parasites wearing their feathers and skins and making tools of their bones and antlers For millennia we have communicated their significance by dancing sculpting performing imaging narrating and thinking them The human species

cannot be fully itself without these others Shepard considers animals as others in a world where otherness of all kinds is in danger and in which otherness is essential to the discovery of the true self We must understand what to make of our encounters with animals because as we prosper they vanish and ultimately our prosperity may amount to nothing without them

Studies in Eighteenth-century Culture ,1971 After Noah Andrew Linzey,Dan Cohn-Sherbok,1997-01-12 A comprehensive study of Jewish and Christian teaching about animals this text argues that the treatment of animals is not only a moral issue but also a theological and spiritual one The authors show how Jews and Christians have often failed to promote a compassionate and sensitive regard for animals The text argues that the way we treat animals is a benchmark of the kind of society we are and that in recognizing the true and biblically based value of animals we liberate ourselves from the idolatry which is to be found at the heart of much contemporary spirituality It is addressed to all people of faith who believe that in devaluing animals we ultimately devalue ourselves and our own souls

The Nature of Cities Michael Bennett,David W. Teague,1999-10 Cities are often thought to be separate from nature but recent trends in ecocriticism demand that we consider them as part of the total environment This new collection of essays sharpens the focus on the nature of cities by exploring the facets of an urban ecocriticism by reminding city dwellers of their place in ecosystems and by emphasizing the importance of this connection in understanding urban life and culture The Nature of Cities offers the ecological component often missing from cultural analyses of the city and the urban perspective often lacking in environmental approaches to contemporary culture By bridging the historical gap between environmentalism cultural studies and urban experience the book makes a statement of lasting importance to the development of the ecocritical movement Publisher s description
