Schwartz, 1987-01 This is a book of readings intended for use as a supplement in courses in medical sociology or the sociology of health and illness taken by students from a variety of disciplines including sociology psychology social work nursing premed and other allied health areas With an emphasis on the descriptive and qualitative rather than the quantitative the articles are accessible to this broad mix of students some selections are from scholarly journals others from nonacademic sources Following a General Introduction the book is divided into three parts focusing on the Patient the Practitioner and the Profession and the System The articles cover a wide assortment of the major issues in medical sociology from genetic engineering to AIDs to hospice care to environmental racism Each of the 11 chapters begins with an introduction which integrates the material and provides context **Dominant Issues in Medical Sociology** Howard D. Schwartz, 1994 An updated edition which focuses on the limitations of the sick role The articles consider two major issues in health care organizations the movement from a service to a profit business orientation and prospective payment fixed payment DRGs **Dominant Issues in Medical Sociology** Howard D. Schwartz, 1987 Bio-social Issues in Health R. K. Pathak, Anil Kishore Sinha, 2008 Themes included are Issues on Health and Disease Approaches Health and Health Care Systems Socio cultural and Ecological Dimension Nutrition Human Growth and Development Health and Mental Illness Contemporary Issues in Tribal Health and Care of the Aged Contributors are from Academic and research institutions of various States and Union Territories Subject specialists from different fields such as Anthropology Biochemistry Bio medicine Community medicine Demography Geography Home science Indigenous System of Medicine Ayurveda Microbiology Pediatrics Philosophy Psychiatry and Social Psychology Covers a variety of therapies ranging from traditional to modern therapy for curing illness and disease Research Papers have been reviewed by the subject specialists Useful for the academicians from the fields of anthropology sociology psychology home science medical professionals social scientists administrators planners NGOs teachers and students of various disciplines and the broad spectrum of scholars interested in

the science of man The Relevance of Social Science for Medicine L. Eisenberg, A. Kleinman, 2012-12-06 The central purpose of this book is to demonstrate the relevance of social science concepts and the data derived from empirical research in those sciences to problems in the clinical practice of medicine As physicians we believe that the biomedical sciences have made and will continue to make important contributions to better health At the same time we are no less firmly persuaded that a comprehensive understanding of health and illness an understanding which is necessary for effective preventive and therapeutic measures requires equal attention to the social and cultural determinants of the health status of human populations The authors who agreed to collaborate with us in the writing of this book were chosen on the basis of their experience in designing and executing research on health and health services and in teaching social science concepts and methods which are applicable to medical practice We have not attempted to solicit contributions to cover the entire range of the social sciences as they apply to medicine Rather we have selected key approaches to illustrate the more salient areas These include social epidemiology health services research social network analysis cultural studies of illness behavior along with chapters on the social labeling of deviance patterns of therapeutic communication and economic and political analyses of macro social factors which influence health outcomes as well as services **Handbook of Health Behavior Research IV** David S. Gochman, 1997-10-31 This landmark treatise provides the first comprehensive review of basic health behavior research In four volumes multidisciplinary contributors critically assess every aspect of health behavior giving special attention to the interrelationship between personal social systems and risk behavior Volume 1 presents useful conceptions of health and health behavior and describes the influence of personal family social and institutional factors Each volume features extensive supplementary and integrative material prepared by the editor the detailed index to the entire four volume set and a glossary of health behavior terminology Negotiating Health Care Sally E. Thorne, 1993-03-24 Contributing a unique perspective to health reform Negotiating Health Care presents the findings of a large qualitative investigation of the experiences of the chronically ill within today's health care system The author develops the argument that chronic illness and acute illness are social experiences of a vastly different order that lead to different health care consequences especially in a health system geared to the miracle cure From interviews with chronically ill patients Thorne discusses the onset of their diseases handling acute episodes and their attempts to normalize life The author also examines the interpersonal experience with health care providers exploring the issues of trust confidence and compliance The institutional experience can and often does pose daunting problems for the chronically ill because of organizational and sociocultural issues health care politics and ideology and the individual patient's response to the system In her concluding chapter Thorne proposes future directions for health care organization biomedical technology and social policy Students and professionals in the fields of nursing allied health medical sciences and human services will find Negotiating Health Care a valuable resource This book is highly recommended for all health care professionals and anyone involved in legislation regarding chronic health care on a national

basis The book also could be very useful for lay people who are chronically ill and for their caregivers and families

Rehabilitation Nursing Finally a window is opened to the experience of chronic illness as it exists within the North American health care system Just in time Every health care provider and reformer who looks inside will be changed by the reflections of themselves they see This book is a courageous voice for both the bolder more conclusive clinical research and for the chronically ill who may yet show us a better way William L Miller M D The University of Connecticut Although there are a number of texts available on chronic illness Dr Thorne s approach to the topic is unique in that it provides a graphic illustration of how the beliefs and values guiding the health care system contribute to problems which the chronically ill encounter in obtaining care By setting the experience of chronic illness in the broader context of the health care system the book provides some clear guidelines for needed changes something I have not found elsewhere This is a valuable piece of work which is a valuable contribution to our understanding of chronic illness and which provides a guide both to practice and to health policy revision Lee Walker R N Ph D The University of Utah This extraordinary book provides rich description and unique insights into the illness experience Data obtained from interviews with 91 informants provides remarkable detail strong linkages to existing theory and powerful development of the illness trajectory The book is well documented methodologically rigorous and presented in a refreshing style Dr Thorne has written a classic Negotiating Health Care will become the book of the 90s for anyone interested in providing humanistic care Jan Morse R N Ph D College of Health and Human Development The Pennsylvania State University The book provides a view into the major issues adults with chronic illness experience in obtaining health care a perspective that is rarely available to those of use who use the health care system mainly for acute problems or indeed who are the providers The book is powerful intense and often uncomfortable reading the patients own words should sensitize all of us who work with the chronically ill Verbatim accounts of patients experiences are woven into a lucid and perceptive view of the structure and organization of Canadian health care which should be read by health policymakers in all the western industrialized countries Juliene G Lipson Ph D F A A N University of California San Francisco Thorne takes a unique approach in providing a graphic illustration of how the beliefs and values guiding the health care system contribute to the problems the chronically ill encounter in obtaining care Those concerned with the evolving social and health policy in the United States would be well served in reading Negotiating Health Care
