Dukes Desire:

Hierarchy Knut Mikjel Rio, Olaf H. Smedal, 2009 On the basis of diverse ethnographic contexts in Oceania Asia and the Middle East the author's challenge current conceptions of hierarchical formations and reassess former debates both with regard to new theoretical issues and the new world situation of post colonial and neocolonial agendas The Headless State David Sneath, 2007-12-21 In this groundbreaking work social anthropologist David Sneath aggressively dispels the myths surrounding the history of steppe societies and proposes a new understanding of the nature and formation of the state Since the colonial era representations of Inner Asia have been dominated by images of fierce nomads organized into clans and tribes but as Sneath reveals these representations have no sound basis in historical fact Rather they are the product of nineteenth century evolutionist social theory which saw kinship as the organizing principle in a nonstate society Sneath argues that aristocratic power and statelike processes of administration were the true organizers of life on the steppe Rethinking the traditional dichotomy between state and nonstate societies Sneath conceives of a headless state in which a configuration of statelike power was formed by the horizontal relations among power holders and was reproduced with or without an overarching ruler or central head In other words almost all of the operations of state power existed at the local level virtually independent of central bureaucratic authority Sneath's research gives rise to an alternative picture of steppe life in which aristocrats determined the size scale and degree of centralization of political power His history of the region shows no clear distinction between a highly centralized stratified state society and an egalitarian kin based tribal society Drawing on his extensive anthropological fieldwork in the region Sneath persuasively challenges the legitimacy of the tribal model which continues to distort scholarship on the history of Inner Asia **Magnanimous Dukes and Rising States** Robert Stein, 2017 In the late fourteenth and the fifteenth centuries the Dukes of Valois Burgundy created a composite monarchy in the Netherlands an area that had been dominated for centuries by several regional dynasties In this way they laid the foundation for the modern states of the Netherlands Belgium and Luxemburg The rise of the House of Burgundy can be read as the success story of a dynasty that in little over a century managed to assemble a great number of principalities thus creating a new state The Burgundian takeover however resulted in a modernization of administration jurisdiction and finances The process of unification and the character of the union are the central topics of Magnanimous Dukes and Rising States Robert Stein mirrors continuity and modernization in Burgundian times with the bankruptcy of the former dynasties and the decline of feudal government The powerful towns played an important background role it was only with their support that a unification of the Netherlands was possible but this support was not unselfish This study is about the development of power relations and institutions in the field of tension between ruler and subject between centralization and particularism

The Low Countries: A History Anthony Bailey, 2016-03-29 Here from British historian and New Yorker senior writer Anthony Bailey is the dramatic story of the Low Countries Belgium the Netherlands and Luxembourg from the early days of

nomads and barbarian invaders to the birth of towns and cities to the rise and decline of world prominence and finally to the dark and tragic days of World War II Machiavelli Niccolò Machiavelli,1905 Oyster Bay Town Records 1653-1878: 1653-1690 Oyster Bay (N.Y.),1916 The Duke's Desire Margaret Moore, 2010-04-07 She d fled the bed of the duke of Deighton and returned to her life of quiet respectability But VerityDavis Jones could never forget Galen Bromney her notorious duke for she saw him daily in the face of their child the daughter shemust deny him along with her heartfelt love Ten years of self imposed exile had done little to dissuade GalenBromney of the rightness of being with Verity Yet how would he everconvince the woman of his dreams that a life together raising their daughter was his deepest desire Norman Rule in Normandy, 911-1144 Mark S. Hagger, 2017 In around **Briefs New York State Appellate Division**, 911 the Viking adventurer Rollo was granted the city of Rouen and its surrounding district by the Frankish King Charles the Simple Two further grants of territory followed in 924 and 933 But while Frankish kings might grant this land to Rollo and his son William Longsword these two Norman dukes and their successors had to fight and negotiate with rival lords hostile neighbours kings and popes in order to establish and maintain their authority over it. This book explores the geographical and political development of what would become the duchy of Normandy and the relations between the dukes and these rivals for their lands and their subjects fidelity It looks too at the administrative machinery the dukes built to support their regime from their toll collectors and vicomtes an official similar to the English sheriff to the political theatre of their courts and the buildings in which they were staged At the heart of this exercise are the narratives that purport to tell us about what the dukes did and the surviving body of the dukes diplomas Neither can be taken at face value and both tell us as much about the concerns and criticisms of the dukes subjects as they do about the strength of the dukes authority The diplomas in particular because most of them were not written by scribes attached to the dukes households but rather by their beneficiaries can be used to recover something of how the dukes subjects saw their rulers as well as something of what they wanted or needed from them Ducal power was the result of a dialogue and this volume enables both sides to speak Mark Hagger is a senior lecturer in medieval history at Bangor University Camden Third Series ,1929 Family Power in Southern Italy Patricia Skinner, 2003-11-13 This 1995 book explores how political power was exerted and family identity expressed in the context of reconstruction of the noble families of the medieval duchies of Gaeta Amalfi and Naples Localised forms of power and the impact of the Norman conquest on southern Italy are assessed by means of a remarkable collection of charters preserved in the Codex diplomaticus Cajetanus The duchy of Gaeta like its neighbours was ruled as a private family business An integral part of its ruling family s power was its monopolisation of parts of the duchy s economy the use of members of the clan to rule local centres When the family broke up the duchy fell to outside predators The three duchies reacted in different ways to the Normans Gaeta flourished commercially in the twelfth century and its unique political response to contacts with the cities of northern Italy especially Genoa forms the final part of this study Oyster Bay Town Records: 1653-1690, with an

appendix containing an historical sketch by George W.
