# Durability By Design A Guide For Residential Builders And Designers

**Richard Bailey**

## **Durability By Design A Guide For Residential Builders And Designers:**

Durability by Design Jay Crandall, 2002-12-01 This manual is intended to raise the awareness and understanding of building durability as a design consideration in housing Covers basic concepts of durability and presents recommended practices including numerous construction details and design data for matters such as moisture management ultraviolet UV protection insects decay corrosion and natural hazards Some attention is also given to matters that may be considered serviceability issues related to normal wear tear aesthetics or functions not immediately associated with durability Helps to preserve and promote tried true practices and concepts related to housing durability and present them in a manner that can be used to cost effectively design the durable homes of the future Illus **Durability by Design** Inc Nahb Research Center, United States. Department of Housing and Urban Development, Dept of Housing and Urban Development, 2005 Few people intentionally consider durability when designing a home but rather rely on experience and market acceptance to make design decisions This approach to design works best in a stable housing market where architectural preferences and material choices do not change or change very slowly The housing market however tends to be dynamic rather than stable and new materials and preferences influence the market continuously sometimes in dramatic ways This dynamic condition also places a responsibility on designers and builders to properly apply their experiences which are often based on older construction methods and materials to new materials and design conditions As a result it is important to understand why certain practices have been effective or ineffective in the past so that they can be properly interpreted and considered in the design and construction of modern homes Durability by Design A Guide for Residential Builders and Designers is intended to raise the awareness and understanding of building durability as a design consideration in housing The Guide covers basic concepts of durability and presents recommended practices including numerous construction details and design data for matters such as moisture management ultraviolet UV protection insects decay corrosion and natural hazards Some attention is also given to matters that may be considered serviceability issues related to normal wear and tear aesthetics or functions not immediately associated with durability The contents of this Guide will help to preserve and promote tried and true practices and concepts related to housing durability and present them in a manner that can be used to cost effectively design the durable homes of the future **Durability by Design** , 2002 *Home Builder's Guide to Coastal Construction* , 2005 **Unsaturated Soils** Gerald A. Miller, 2006 A Professional's Guide to Durable Home Design R. E. D. Dot RED DOT PUBLICATIONS, 2017-10-30 America's path to sustainable communities of quality affordable homes rests upon durability In the past 10 years the methods and materials used to construct homes have changed remarkably requiring designs that allow for those changes to contribute to the durability of the home from the foundation to the roof These changes are part of a broader shift to more efficient and sustainable homes While sustainability is important the efficiency and environmental benefits of these homes will not be realized without design and construction that address moisture insects and other natural hazards that can undermine home

quality and livability over time The need for forward thinking design and construction is why this updated publication *Durability by Design* is so timely and important First published by the U S Department of Housing and Urban Development HUD in 2002 this guide has consistently been one of the Department s most popular publications With this updated guide HUD is offering new and refined guidance for designing durable homes for today s housing industry addressing critical topics including water vapor management envelope design and natural hazards Although the primary audience for *Durability by Design* is designers and builders the benefits of the topics reach families and communities throughout the country Building more durable homes also means providing more comfortable affordable efficient and sustainable homes for America s families

**Department of Housing and Urban Development** United States. Congress. House. Committee on Appropriations. Subcommittee on HUD-Space-Science-Veterans,1974 *Residential Structural Design* Mr. Rohit Manglik,2023-10-23 Focuses on structural design principles specific to residential buildings including load calculations framing systems foundations and building codes eWork and eBusiness in Architecture, Engineering and Construction Gudni Gudnason,Raimar Scherer,2012-07-06 Since 1994 the European Conferences of Product and Process Modelling [www.ecppm.org](http://www.ecppm.org) have provided a review of research development and industrial implementation of product and process model technology in the Architecture Engineering Construction and Facilities Management AEC FM industry Product Building Information Modelling has matured significantly in the last few years and has never been closer to having a permanent impact on the AEC FM industry as a mainstream technology In this context the 9th European Conference of Product and Process Modelling provided a forum for leading experts to discuss the latest achievements emerging trends and future directions in product and process modelling technology in this dynamic and fragmented industry focusing on integrated project working value based life cycle management and intelligent and sustainable buildings and construction eWork and eBusiness in Architecture Engineering and Construction 2012 provides a comprehensive overview of topics including BIM in all life cycle stages ICT for energy efficiency smart buildings and environmental performance energy and building simulation knowledge and semantic modelling visualization technologies as well as tools and methods to support innovations in design and construction processes It further includes the proceedings of the 3rd Workshop on eBuildings Data Models Energy Efficiency Vocabularies which aim to identify ICT Energy Efficiency Vocabularies and Ontologies to foster interoperability of Energy Efficiency Management Systems eWork and eBusiness in Architecture Engineering and Construction 2012 will be of interest to academics and professionals working in the interdisciplinary area of information technology in architecture engineering and construction *HUD-space-science-veterans Appropriations for 1975* United States.
