Drawings from the Age of Bruegel, Rubens, and Rembrandt William W. Robinson, 2016-08-02 This superb book presents 100 notable examples from the Harvard Art Museums distinguished collection of Dutch Flemish and Netherlandish drawings from the 16th to 18th century Featuring such masters as Pieter Bruegel the Elder Peter Paul Rubens and Rembrandt van Rijn the volume showcases beautiful color illustrations accompanied by insightful commentary on prevalent styles and techniques Genres that define this artistic period landscape scenes of everyday life portraiture and still life are explored in detail The book also presents the results of new conservation and technical study including infrared analysis and scientific examinations of drawing materials This revelatory new research has allowed previously illegible underdrawings and inscriptions in many of the artworks to surface for the first time shedding light on longstanding mysteries of production and provenance *Seventeenth-Century Dutch and Flemish Painting* Ivan Gaskell, Sammlung Thyssen-Bornemisza, 1990 A catalogue of 128 paintings produced during this period in which the art of portraiture was transformed religious imagery dynamized and new genres such as flower painting were established The art of Holland's Golden Age is perennially popular with collectors and gallery visitors alike and this book provides a new insight into this unique private collection In his introduction Ivan Gaskell considers the extremely

varied character of Dutch and Flemish seventeenth century art. It ranges from minutely observed scenes of everyday life to portraits, religious works and intimate still life compositions. The Thyssen Bornemisza Collection is especially rich in landscapes, a subject which had emerged as a separate genre in the Netherlands in the previous century. The author outlines the development of painting on both sides of the border, placing it in its social and historical context and goes on to discuss the taste for Dutch and Flemish art from the seventeenth century to the present day and spotlights some of the earlier collectors. This detailed catalogue of 128 paintings is the result of meticulous research in British, Dutch and American libraries and archives. The entries are arranged in ten groups by subject so that thematic similarities can be conveniently examined. Amongst the most celebrated works is Frans Hals's monumental Family Portrait, once the most expensive painting in the world. All the paintings are illustrated in colour and are accompanied by comparative illustrations and technical photographs.
