Dutch Miracle Job Growth Welfare Reform And Corporatism In The Netherlands:

A Dutch Miracle Jelle Visser, Anton Hemerijck, 1997 Explores the Netherlands recovery from the severe unemployment crisis in the early 1980s to record job growth in the 1990s Distinguishes three policy changes to explain the miracle the wage restraints since the early 1980s the reform of the social security system ten years later and the active employment policy of the 1990s Third Way Reforms Jingjing Huo, 2009-04-27 This book examines the transformation of contemporary social

democracy through the concept of third way reforms It proposes a set of theories about the possibility for continuing social democratic ideological adaptation for ideologies to overcome institutional constraints in triggering path breaking innovations and for social democracy to bridge the insider outsider divide Empirically the book utilizes these theories to account for social democratic welfare state and labor market reforms in nine OECD countries after the end of the Golden Age Based on the logic of public evils the book proposes that the ideologically contested nature of institutions provides incentives for institutional innovation Social democratic ideology shapes the fundamental characteristics and content of the third way policy paradigm and the paradigm's practical implementation continues to be path dependent on historical institutional settings

Policy Concertation and Social Partnership in Western Europe Stefan Berger, Hugh Compston, 2002-02 Policy concertation the determination of public policy by means of agreements struck between governments employers and trade unions continues to thrive in Western Europe despite the impact of liberalizing trends that were expected to lead to its demise This volume brings together a team of 23 experts with the aim to undertake paired historical and political studies of policy concertation in ten West European countries which were then subjected to systematic comparative analysis It shows that overall the incidence of broad policy concertation in Western Europe can be explained by the changing configurations of just three variables

The Oxford Handbook of Dutch Politics, 2024-10-06 The Oxford Handbook of Dutch Politics provides a comprehensive longitudinal overview of the state of the art of academic research on the Dutch political system its origins and historical development its key institutions main fault lines pivotal processes and key public policy dynamics In each of the chapters researchers take stock of what if anything has changed over time how scholars have conceptualized and studied these dynamics and what key factors can account for the developmental patterns found to be at play Notwithstanding its considerable degree of constitutional and institutional stability Dutch politics has seen considerable step changes and occasional upheavals across the last half century Influenced by long term demographic socio economic and cultural shifts the old social cleavages have waned New social identities and dividing lines such as ethnicity education place and gender have influenced Dutch citizens political attitudes and behaviours including their voting patterns The media landscape and the information environment have been altered by new technologies that politicians and citizens alike have to navigate This has produced changes in such pivotal components as the party system coalition formation and management process and executive legislative relations and many others Moreover public policy paradigms and the political coalitions that sustained

them have ascended and lost traction in most of the eleven policy domains discussed in the Handbook In all this volume provides unique and indispensable insights into stability and change in a political system that once gained notoriety as an archetype of a consensual or consociational democracy

Politics in the Dutch Economy Bart Snels, 2018-12-20 First published in 1999 this volume surveys economic theories of political mechanisms as well as political theories of the influence of the institutional context in which decisions about social economic policies are being made In the first half of the seventeenth century the Dutch Republic emerged as one of Europe's leading maritime powers The political and military leadership of this small country was based on large scale borrowing from an increasingly wealthy middle class of merchants manufacturers and regents This volume presents the first comprehensive account of the political economy of the Dutch republic from the sixteenth to the early nineteenth century Building on earlier scholarship and extensive new evidence it tackles two main issues the effect of political revolution on property rights and public finance and the ability of the nation to renegotiate issues of taxation and government borrowing in changing political circumstances

Wage Setting, Social Pacts and the Euro Anke Hassel, 2006 Politicians economists and social theorists tend to agree that globalization and neo liberal economic policy have contributed to the decline of the social compacts underlying traditional European welfare states Recently however social pacts have demonstrated an impressive resurgence as governments across Europe facing necessary economic policy adjustments have chosen to view trade unions as vital negotiating partners rather than adversaries Wage Setting Social Pacts and the Euro offers a theoretical understanding of the forces that have led to this new understanding and of the challenges that increasing monetary integration will continue to pose

The Politics of Social Inclusion and Labor Representation Heather Connolly, Stefania Marino, Miguel Martínez Lucio, 2019-05-15 In *The Politics of Social Inclusion and Labor Representation* Heather Connolly Stefania Marino and Miguel Martínez Lucio compare trade union responses to immigration and the related political and labour market developments in the Netherlands Spain and the United Kingdom The labor movement is facing significant challenges as a result of such changes in the modern context As such the authors closely examine the idea of social inclusion and how trade unions are coping with and adapting to the need to support immigrant workers and develop various types of engagement and solidarity strategies in the European context Traversing the dramatically shifting immigration patterns since the 1970s during which emerged a major crisis of capitalism the labor market and society and the contingent rise of anti immigration sentiment and new forms of xenophobia the authors assess and map how trade unions have to varying degrees understood and framed these issues and immigrant labor They show how institutional traditions and the ways that trade unions historically react to social inclusion and equality have played a part in shaping the nature of current initiatives *The Politics of Social Inclusion and Labor Representation* concludes that we need to appreciate the complexity of trade union traditions established paths to renewal and competing trajectories of solidarity While trade union organizations remain wedded to specific trajectories trade union renewal remains an innovative if at times

invites readers to question the effects of labour market institutional and organisational reforms on social cohesion The Council of Europe suggests reconciling social cohesion with the inevitable changes wrought by globalisation namely the reorganisation of the parameters governing competition This reconciliation should take into account the essential political value of democratic security to be found firstly in employment the high social and societal cost of precariousness attests to this However security should not imply rigidity It should rather translate into societal recognition of a right to transition which calls for co responsibility on the part of all social actors and stakeholders Reconciliation is more than a political duty it is a prerequisite for the stability necessary for social sustainability It should therefore raise awareness of the need to find new ways of fairly sharing the costs and benefits such transitions create Council of Europe *Social Dialogue in Western*
