Dutch Painting:

Dutch Seventeenth-century Genre Painting Wayne E. Franits, 2004-01-01 The appealing genre paintings of great seventeenth century Dutch artists Vermeer Steen de Hooch Dou and others have long enjoyed tremendous popularity This comprehensive book explores the evolution of genre painting throughout the Dutch Golden Age beginning in the early 1600s and continuing through the opening years of the next century Wayne Franits a well known scholar of Dutch genre painting offers a wealth of information about these works as well as about seventeenth century Dutch culture its predilections and its prejudices The author approaches genre paintings from a variety of perspectives examining their reception among contemporary audiences and setting the works in their political cultural and economic contexts The works emerge as distinctly conventional images Franits shows as genre artists continually replicated specific styles motifs and a surprisingly restricted number of themes over the course of several generations Luxuriously illustrated and with a full representation of the major artists and the cities where genre painting flourished this book will delight students scholars and general readers alike

Shifting Priorities Nanette Salomon, 2004 This ground breaking book offers the first sustained examination of Dutch seventeenth century genre painting from a theoretically informed feminist perspective Other recent works that deal with images of women in this field maintain the paradoxical combination of seeing the images as positivist reflections of life as it was and as emblems of virtue and vice These reductionist practices deprive the works of their complex nature and of their place in visual culture important frameworks that the book attempts to restore to them Salomon expands the possibilities for understanding both familiar and unfamiliar paintings from this period by submitting them to a wide range of new and provocative questions Paintings and prints from the first half of the century through to the second are analyzed to understand the changing social roles and values attributed to the sexes as they were introduced and reflected in the visual arts

The Art of the Dutch Republic, 1585-1718 Mariët Westermann, 2004 The art of the Dutch republic in the seventeenth century includes some of the most familiar and best loved examples of European painting exquisite still life studies tranquil interiors robust portraits and rowdy tavern scenes In this account Mariët Westermann describes this art as it was experienced by the people of the period and as it appears to us today She examines the major themes of Dutch art including the growth and expression of national identity the celebration and examination of the individual through portraiture and the changing status of artists themselves

BOOK JACKET

Art of the Everyday Ruth Bernard Yeazell, 2008 Realist novels are celebrated for their detailed attention to ordinary life But two hundred years before the rise of literary realism Dutch painters had already made an art of the everyday pictures that served as a compelling model for the novelists who followed By the mid 1800s seventeenth century Dutch painting figured virtually everywhere in the British and French fiction we esteem today as the vanguard of realism Why were such writers drawn to this art of two centuries before What does this tell us about the nature of realism In this beautifully illustrated and elegantly written book Ruth Yeazell explores the nineteenth

century's fascination with Dutch painting as well as its doubts about an art that had long challenged traditional values. After showing how persistent tensions between high theory and low genre shaped criticism of novels and pictures alike, *Art of the Everyday* turns to four major novelists: Honoré de Balzac, George Eliot, Thomas Hardy, and Marcel Proust, who strongly identified their work with Dutch painting. For all these writers, Dutch art provided a model for training themselves to look closely at the particulars of middle class life. Yet even as nineteenth century novelists strove to create illusions of the real by modeling their narratives on Dutch pictures, Yeazell argues, they chafed at the model. A concluding chapter on Proust explains why the nineteenth century associated such realism with the past and shows how the rediscovery of Vermeer helped resolve the longstanding conflict between humble details and the aspirations of high art.

Dutch Paintings in the Metropolitan Museum of Art Walter A. Liedtke, Metropolitan Museum of Art (New York, N.Y.), 2007. Presents a catalog that surveys the Dutch paintings found in the Metropolitan Museum of Art.

Picturing Men and Women in the Dutch Golden Age Muizelaar Klaske, 2003-01-01. Taking as their premiss the subjective experience of art, the authors look at how paintings by Rembrandt, Vermeer, and other masters were displayed and comprehended in the 17th century.

Dutch Painting Marjorie E. Wieseman, Elena J. Greer, 2014. The National Gallery, London, is home to a world renowned collection of Dutch paintings that includes masterpieces by Rembrandt, Vermeer, Hals, Cuyp, and Ruisdael, among many others. Still lifes painted with painstaking attention to detail, sublime landscapes, vividly human portraits, and intimate interiors: these beloved paintings tell the story of the Dutch Golden Age when art, science, and trade thrived. Now the National Gallery's popular 2007 guide to the collection has been revised, featuring an elegant new design and an extended introduction that examines why painting flourished in the 17th century Dutch Republic and why it is so enduringly popular today. Striking image details enhance the book, and updated informative texts accompany each work of art. Accessible and illuminating, this guide is essential reading for anyone with an interest in Dutch painting. Published by National Gallery Company, Distributed by Yale University Press.

Creating Distinctions in Dutch Genre Painting Angela Ho, 2025-10-01. In the mid to late seventeenth century, a number of Dutch painters created a new type of refined genre painting that was much admired by elite collectors. In this book, Angela Ho uses the examples of Gerrit Dou, Gerard ter Borch, and Frans van Mieris to show how this group of artists made creative use of repetition, such as crafting virtuosic self-referential compositions around signature motifs or engaging esteemed predecessors in a competitive dialogue through emulation, to project a distinctive artistic personality. The resulting

paintings enabled purchasers and viewers to exercise their connoisseurial eye and claim membership in an exclusive circle of sophisticated enthusiasts making creative repetition a successful strategy for both artists and viewers Angela Ho shows how Dutch painters in the mid to late 17th century used repetition to project a distinctive artistic personality *The Age of Rembrandt* Roland E. Fleischer, Susan Scott Munshower, 1988-01-01 This is a study of seventeenth century Dutch painting

The Dutch Painters Christopher Wright, 1978 **The Visible and the Invisible** Daniela Hammer-Tugendhat, 2015-03-10 The book addresses the scientific debates on Rembrandt Metsu Vermeer and Hoogstraten that are currently taking place in art history and cultural studies These focus mainly on the representation of gender difference the relationship between text

and image and the emotional discourse They are also an appeal for art history as a form of cultural studies that analyses the semantic potential of art within discursive and social contemporary practices Dutch painting of the seventeenth century reflects its relationship to visible reality It deals with ambiguities and contradictions As an avant garde artistic media it also contributes to the emergence of a subjectivity towards the modern bourgeois It discards subject matter from its traditional fixation with iconology and evokes different imaginations and semantizations aspects that have not been sufficiently taken into account in previous research The book is to be understood as an appeal for art history as a form of cultural science that analyses the semantic potential of art within discursive and social contemporary practices and at the same time demonstrates its relevance today Works by Rembrandt Metsu Vermeer Hoogstraten and others serve as exemplary case studies for addressing current debates in art history and cultural studies such as representation of gender difference relationship between text and image and emotional discourse
